PLAN FOR LIFE CONDITIONS OF USE, DISCLAIMERS AND DISCLOSURE

This Report has been prepared by Plan for Life Pty Ltd ABN 97 006 233 923 (Plan For Life).

No part of this publication may be reproduced or distributed in any form without our express prior written consent.

Plan For Life has taken all reasonable care in preparing this Report and takes no responsibility for inadvertent errors and omissions, or those due to information received from other parties. If any errors or omissions are found, these should be brought to our attention so that appropriate corrective action can be taken.

The material is provided by Plan For Life on the basis that it is only for internal management by subscribers and may not be distributed to retail clients under any circumstances.

Plan For Life takes no responsibility for the subsequent use of the material provided.

Plan For Life, its employees and associated persons make no recommendations, representations, warranties nor provide opinions, implied or otherwise about the suitability in general terms of a particular asset type or insurance and its suitability for any particular individual or organization.

This report is provided as an information service and is not suitable to be acted upon as investment advice without additional input from an Authorized Representative of an Australian Financial Services License Holder. In particular, Plan For Life warns that in preparing this report it did not take into account the individual goals and objectives, anticipated resources, current situation, attitudes or other circumstances of any particular person - in this regard any such user must consult with an appropriate Authorized Representative Australian Financial Services License Holder.

Plan For Life is a firm of Consulting Actuaries and Researchers which provides a range of research services including data, software and consulting services to Investment, Insurance Risk and other financial services organizations. Plan For Life also provides some of these services to Investment Advisory and Financial Planning organizations.

Plan For Life is not owned by investment or life insurance product providers or any individual or organization which provides product or investment advice to companies or individuals.

Plan For Life, its employees and associated persons may hold units, investments or insurances in some of the products covered by this report.

EXECUTIVE SUMMARY

Macquarie Active provides cover in the event of certain health events, Death and Terminal Illness and (non occupational) total and permanent disability. The Active product range also

- provides a wider range of cover for Health Events than provided by other products to date
- for the first time serious mental illness and back injuries are specifically covered
- payments are based on the severity of the sickness or accident
- the expanded and redefined Activities of Daily Living provides a broad safety net for conditions not specifically provided for in the listed Health Events
- 20% to 30% saving in premiums is available across a range of ages and occupations when compared to more conventional products
- The Active product suite also includes Additional Death Cover, Child Cover and Income Protection as optional products

When taking these factors together Macquarie Life Active has the potential to provide value for money protection for many clients.

1. INTRODUCTION

We have been retained by Macquarie Life to review their new Active product prior to its launch.

Macquarie Life Active is quite different to other Life Insurance products available in the Australian market as the focus is on providing benefits in line with the seriousness of the illness or accident.

As we understand it, the design of the new product does not have a good fit with current research methodologies and existing product structures, so consequently we have been retained to produce an independent review of the new product, applying our research analysis techniques where necessary. The report covers the following areas:

- description of the product design
- features
- price
- suitability as an insurance solution
- additional considerations relative to other insurance products
- overall comments

1.1 MACQUARIE LIFE

Based on Macquarie's reputation for providing quality investment products, Macquarie Life has built a reputation for a quality product offer and a focus on providing service to advisers over the past 3 years. It has established a range of products in the individual risk market which includes:-

Product Range	Products
FutureWise	Life Cover, linked TPD and Trauma, Stand Alone TPD, Stand Alone Trauma, Child Cover, Income Protection and Business Expenses
FutureWise Super	Life Cover with linked TPD and Stand Alone TPD
Super Protector linked to the Macquarie Master Fund	Life Cover with linked TPD and Stand Alone TPD and Income Protection
Sumo	Large case product suite

In addition, Macquarie has pioneered the use of linkages between products inside and outside super to reduce the effective cost of insurance for clients.

Together with their highly regarded individual risk online application and underwriting system Macquarie provides a quality, competitive Life Insurance offer.

2. PRODUCT OVERVIEW

Macquarie Active provides cover in the event of Death and Terminal Illness, most health events and (non occupational¹) total and permanent disability.

The Macquarie Life Active product suite also includes the following optional products:-

- additional Death cover
- Child Trauma
- Income Protection

These optional products are very similar to the Macquarie FutureWise products in terms of product features and pricing and are not the main focus of this report.

¹ Musculo-skeletal events include assessment criteria based on Any Occupation
Copyright Plan For Life Pty Ltd 2010

The Death and Terminal Illness Cover works in a conventional way i.e. payment on death or terminal illness with advance payment of part of the sum insured for funeral costs on death.

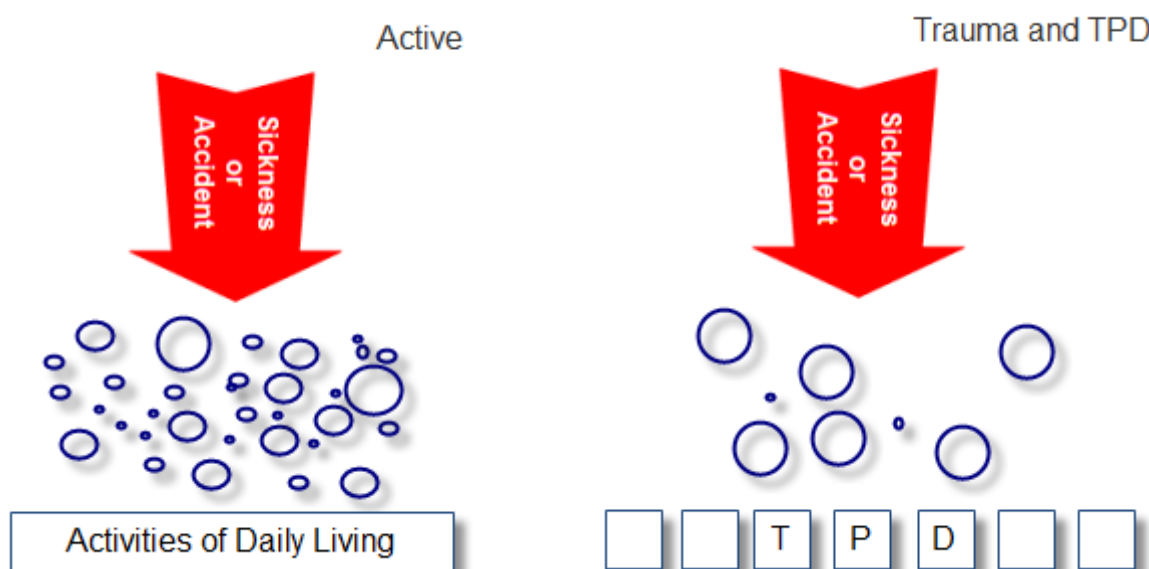

The policy ceases on Death or the payment of Terminal Illness benefits.

Health Events Cover

With Macquarie Life Active Health Events Cover, there are many more events when compared to other Trauma products and each event is paid based on the seriousness of the event with the underlying safety net of the Activities of Daily Living event to provide coverage for undefined events. In this way Macquarie Life can claim that Active provides coverage for most serious illnesses and accidents that result in significant time off work.

Activities of Daily Living has been redefined and now is made up of a broader range of activities not just self care i.e. Bathing, Grooming, Dressing, Eating and Feeding, Bowel and Bladder function.

Health Events cover can be illustrated by the following image². We have also presented an image that shows a more conventional Trauma and TPD product. However, TPD is only paid if the TPD criteria are met - this usually means a significant level of impairment based on the ability to work. A particular condition may result in a different outcome depending on the occupation of the insured.

What is very different about Active is that the amount paid for a particular Health Event varies, based on the seriousness of the event. This means that a serious but short lived Health Event such as Acute Renal Failure where the insured can be expected to be off work for some time but is expected to recover substantially and return to work is paid at a lower level than a serious illness that results in a significant and permanent reduction of physical abilities.

Staged levels of payment can result in advantages for the insured as the Health Event payments start to be paid at lower levels of severity. This means that payments are more likely to be available when needed i.e. when a Health Event occurs.

An example of payments that vary based on severity is set out in the following table.

² The size of the number of the bubbles represents the size of the Event payments. The number of bubbles represents the events covered. The Activities of Daily Living box represents the support that the ADL Event provides for events that have not been defined.

For the TPD and Trauma image the TPD represents the 'catch all' where Permanent Disability occurs due to reasons other than a defined Trauma event.

Kidneys - Renal Failure

Level of Payment 100%	Level of Payment 65%	Level of Payment 40%	Level of Payment 20%	Level of Payment 5%
Chronic renal failure where a renal physician has confirmed that on the basis of the insured person's medical condition, the insured person is permanently excluded from access to renal transplantation.	Chronic renal failure			Acute renal failure

The following are excluded under the 'Kidneys and urogenital tract' body system:

- . Transgender surgery;
- . Acute renal failure caused by alcohol/ drugs or substance abuse.

Most competing Trauma products are unlikely to have paid a benefit at the lowest level as the event is unlikely to have met the criteria for payment.

Range of Health Events covered

The Health Events Cover is designed to provide payments in line with the severity of the accident or disease. In summary we have provided an extract of the summary list of trauma events from the PDS.

Benefit Category	Summary of Health Events covered
Cancer	. solid tumour cancers . Lymphomas . brain tumours . leukemias . other cancers (e.g. aplastic anaemia)
Heart and Artery	. heart attack . cardiomyopathy . other heart and artery conditions (e.g. severe congestive cardiac failure, severe peripheral vascular disease) . heart transplant . surgical procedures (e.g. coronary artery bypass graft, heart valve repair, iliac or femoral artery aneurysm repair grafting)
Brain and nerves	. stroke . cognitive conditions (e.g. diagnosis of dementia including Alzheimer's disease) . coma . surgical procedures and events (e.g. endovascular treatment of a cerebral aneurysm, stereotactic brain surgery) . other brain and nerve conditions (e.g. psychiatric conditions, severe epilepsy, multiple sclerosis)
Digestive system	. transplants . surgical procedures (e.g. colostomy/ileostomy, surgical repair of trachea-oesophageal fistula) . other digestive conditions (e.g. gastrointestinal disease, Crohn's disease, portal vein thrombosis) . liver conditions
Kidney and Urogenital tract	. chronic renal failure . kidney transplant . surgical procedures (e.g. nephrectomy)

Benefit Category	Summary of Health Events covered
Lung	. diseases of the lung . surgical procedures (e.g. lobectomy) . lung transplant . other lung conditions (e.g. lung abscess)
Musculo-skeletal system	. burns . back and limb and whole person impairment
Ear	. loss of hearing . surgical procedures (e.g. inner ear or middle ear surgery)
Eye	. loss of sight . surgical procedures (e.g. surgical repair of detached retina, corneal transplant)
HIV/AIDS	. HIV/AIDS
General	. hospital admission . inability to perform activities of daily living

Events covered by Active but not covered by conventional Trauma products

There are many events that are covered by this product that are not covered by more traditional trauma products. Whilst many events pay out 5% of the original sum insured, some events that have more serious impact on the insured's life are paid at the 20% and 40% level. As a result, the improvement in coverage of events that result in periods away from work is significant.

Of particular note is the inclusion of Back injury and Psychiatric conditions.

The following table sets out the conditions and the level of payment not covered by Macquarie FutureWise and most other conventional Trauma polices that are covered by Active together with the percentage of original sum insured that would be paid.

Category	Health Event	Level of Payment
Cancer - Other	Bone marrow or stem cell transplant to treat a disease other than cancer	5%
Heart and Artery – Surgical procedures	Endovascular heart valve repair or replacement	5%
	Endovascular or open carotid artery stenosis repair	5%
	Endovascular repair of an aortic aneurysm	5%
	Endovascular repair to correct structural lesions of the heart	5%
	Endovascular iliac or femoral artery aneurysm grafting	5%
	Permanent cardiac defibrillator	5%
Heart and Artery – Cardiac Conditions	Severe peripheral vascular disease with gangrene and severe vascular ulceration	40%
	Severe congestive cardiac failure	100%
Brain & Nerves – Surgical procedures and events	Craniotomy to treat a cerebral arteriovenous malformation	40%
	Craniotomy to treat a cerebral aneurysm	40%
	Craniotomy to remove a benign brain tumour	40%
	Endovascular treatment of a cerebral arteriovenous malformation	5%
	Endovascular treatment of a cerebral aneurysm	5%
	Endovascular treatment of a subarachnoid haemorrhage	5%
	Stereotactic brain surgery	5%
	Psychiatric condition resulting in: – Permanent and irreversible inability to perform 4 out of 6 activities of daily living; or – Permanently placed under public guardianship by the Guardianship Board due to concern for their own safety or safety of others; or – Total lack of social interaction	100%
Brain & Nerves – Other	Permanent total aphasia	100%
	Psychiatric condition	20%
	Diagnosis of bilateral hemianopia	40%

Category	Health Event	Level of Payment
	Diagnosis of myasthenia gravis	5%
	Diagnosis of cavernous sinus thrombosis	5%
Digestive System – Surgical procedures	Colectomy	40%
	Colostomy/Ileostomy	40%
	Surgical repair of tracheo-oesophageal fistula	5%
	Chronic anal fistula requiring three or more in-patient surgical procedures	5%
Digestive System – Other	Objective evidence of gastrointestinal disease with all of the following: – persistent disturbance of bowel function at rest with severe persistent pain; – complete limitation of activity, continued restriction of the diet with no response to medical therapy; – constitutional symptoms – fever, weight loss or anaemia where there is no prolonged remission; and – there have been at least 4 hospital admissions in a 12 month period	100%
	Permanent and ongoing inability to swallow requiring permanent extraneous feeding methods	100%
	Objective evidence of gastrointestinal disease with all of the following: – severe exacerbations of bowel dysfunction with disturbance of bowel function with continual pain; – restriction of activity, continued restriction of the diet with no response to medical therapy; – constitutional symptoms – fever, weight loss or anaemia; and – there have been at least 2 hospital admissions in a 12 month period	65%
	Severe Crohn’s disease	40%
	Portal vein thrombosis	5%
	Severe ulcerative colitis	5%
	Crohn’s disease	5%
Digestive System – Liver	Partial hepatectomy (donors and liver biopsies excluded)	5%
Kidneys – Renal Failure	Acute renal failure	5%
Kidneys – Surgical procedures	Total cystectomy requiring a urinary conduit	40%
	Nephrectomy (donors excluded)	5%
	Bilateral orchidectomy due to disease	5%
	Bladder fistula requiring a surgical procedure for closure of the fistula	5%
	Vesico/recto-vaginal fistula requiring a surgical procedure for closure of the fistula	5%
Lungs – Surgical procedures	Lobectomy (excluding biopsy procedures and donors)	20%
Lungs - Other	Lung abscess requiring surgical drainage through an open thoracotomy (simple percutaneous drainage procedures excluded)	5%
	Chronic bronchopleural fistula requiring a surgical procedure for closure of the fistula through an open thoracotomy	5%
	Chronic bronchiectasis requiring daily physiotherapy or postural drainage on instruction of a lung specialist for a period of more than 3 months and under the continuous care of a respiratory physician	5%
	Multiple episodes of recurrent pulmonary emboli separated by a period of 6 months requiring insertion of a veno-caval filter	5%
Musculo-skeletal system	Le Forte III reconstruction	5%
	Amputation of 2 or more fingers at the PIP or MCP joint, one of which must be either the index finger or thumb (must be due to either disease or accident)	5%
Ear – surgical procedures	Inner ear or middle ear surgery	5%
	Radical or modified radical mastoidectomy where considered the appropriate and necessary treatment by a medical specialist	5%

Category	Health Event	Level of Payment
Eye – surgical procedures	Surgical repair of a detached retina (laser surgery excluded) Corneal transplant	5%
	Surgical repair of a detached retina (laser surgery excluded) Corneal transplant	5%
General – Hospital admission	Intensive care unit (ICU) admission for at least 5 weeks where ongoing assisted mechanical ventilation is required for at least 3 weeks	20%
	Hospital admission for at least 4 weeks after spending at least 1 week in ICU. Ongoing medical treatment is required in an acute healthcare setting or rehabilitation facility throughout this entire hospital admission period (i.e. over the minimum 5 week period).	5%

In addition to the above, many Health Event definitions are based on the outcome of the condition meaning that Active can provide coverage for an event that leads to a level of physical or mental impairment as defined in the policy irrespective of the actual underlying medical cause.

Multiple Claims Policy

Active has been designed as a multiple claims policy from the outset, i.e. the policy continues to be in force and provides cover following one or more claims. Conventional Trauma products usually allow for some degree of multiple claims via Partial Trauma and Trauma Reinstatement options.

The key differences that separate Active from other Trauma policies include:

- a claim for an event does not remove the ability to claim on another event.

For example: Following a claim for Heart Attack, after Reinstatement, many Trauma products will exclude Stroke. Active does not do this and will pay a claim on both events.

Likewise, cancer of the same cell type only, is excluded for subsequent claims. If cancer of a difference cell type occurs, Active will pay a claim on both events.

Active has 2 limitations that affect the claim payment amounts

- the Limited Claim period
 - Progressive Conditions
 - the amount of cover reduces after each Health Event claim. Claims also reduce the amount of cover for Death. (Health Event claims do not affect any Additional Death cover.)
- For example if say two 65% level claims are made, the first payment of 65% is made and the second is paid at 35%.
- Claim Protector ensures that the sum insured does not reduce to below 25% of the original sum insured.

Limited Claim Period

Once a Health Event claim occurs, a limited claim period of 12 months starts. Any claim during the Limited Claim period is reduced by any previous payments.

Once the 12 month limited claim period has elapsed, further Health Event claims are payable. The level of payment depends on the remaining amount of cover.

Claims due to accidents are exempt from the 12 month Limited Claim period.

Claim Protector

There is a minimum level below which the sum insured cannot be reduced following a Health Event claim. This Protected Claim level is 25% of the initial sum insured. This means that in the event of a 100% claim for a Health Event (other than Death and Terminal Illness) there will still be 25% sum insured left for further unrelated Health Events.

The Claim Protector does not affect any death or terminal illness cover.

Progressive Conditions

It is important to note that in many instances that Macquarie Active provides progressive benefits cover. That is, as the severity of a condition worsens (and the condition meets the assessment criteria for a higher level of claim), the payments are increased to the higher level.

This has the advantage that the policy is likely to start paying benefits when they are needed i.e. soon after the occurrence of the Health Event. Additional payments are made as the severity of the Health Event condition worsens.

What this means is best illustrated by an example

Trauma Event	Criteria For Payment	Level of Payment
Heart Attack	Heart attack Myocardial infarction, characterised by death of a portion of heart muscle due to inadequate blood supply. The following clinical features must be present (and not caused by medical intervention): - new ECG changes; and - elevation of cardiac enzymes, troponins or other biochemical markers above generally accepted laboratory levels of normal. If the above is inconclusive then we will consider a claim based on conclusive evidence that myocardial infarction has occurred, resulting in either one of the following: - new pathological Q-waves; - a permanent left ventricular ejection fraction of 50% or less, measured six weeks or more after the event, provided the date of the event is able to be established.	40%
	Heart attack resulting in permanent* and irreversible left ventricular ejection fraction of 30 to 40%	65%
	Heart attack resulting in permanent* and irreversible left ventricular ejection fraction of less than 30% whilst on ongoing optimal therapy	100%

For a life insured who has had a Heart attack that results in a “a permanent left ventricular ejection fraction of 50% or less” a benefit of 40% of the sum insured is paid. If subsequently the left ventricular fraction reduces to 40% or below, the benefit will be increased to 65% of the sum insured, resulting in a further payment of 25% of the original sum insured.

Further details of the events, claim criteria and the levels of payment are set out in Appendix 1.

Progressive Benefits are limited to the progression of the event (see above for an example) and in some circumstances events related to the condition.

The following table is an extract from the Macquarie Life Active PDS Progressive Conditions section. This table describes conditions which are considered to be progressive conditions of a Health Event.

Condition for which a claim has been paid:	Conditions which are considered to be <i>Progressive Conditions</i> to the condition for which a claim has been paid:
Any arthritis, osteoporosis	Any arthritis, osteoporosis
Cancer	Cancer of the same cell type, including any treatment or disease for cancer of the same cell type.
Cognitive conditions	Coma, Parkinson's disease, stroke.
Multiple sclerosis	Any cognitive condition.
Muscular dystrophy	Cardiomyopathy.
Parkinson's disease	Any cognitive condition.
Stroke	Cognitive conditions, Parkinson's disease.
Any psychiatric condition	Any psychiatric condition
Brain and neurological conditions, epilepsy	Brain and neurological conditions, coma, stroke, epilepsy.
Any other condition described by a neurologist to be a chronic neurological disease including but not limited to the following: permanent vegetative state, profound short term memory loss, multiple sclerosis, dementia, epilepsy, myasthenia gravis, Alzheimer's disease, muscular dystrophy, motor neurone disease.	Any other condition described by a neurologist to be a chronic neurological disease including but not limited to the following: permanent vegetative state, profound short term memory loss, multiple sclerosis, dementia, epilepsy, myasthenia gravis, Alzheimer's disease, muscular dystrophy, motor neurone disease.
Progressive systemic sclerosis, systemic lupus erythematosus, sarcoidosis, polyarteritis nodosa, giant cell arteritis, polymyositis, Wegener's granulomatosis, rheumatoid arthritis	Rheumatoid arthritis, progressive systemic sclerosis, systemic lupus erythematosus, sarcoidosis, polyarteritis nodosa, giant cell arteritis, polymyositis, Wegener's granulomatosis, rheumatoid arthritis
Any cardiac condition or procedure	Any cardiac condition or procedure that is directly or indirectly related to the same underlying condition, medical cause or pathology as a prior claim.
Any lung condition or procedure	Any lung condition or procedure that is directly or indirectly related to the same underlying condition, medical cause or pathology as a prior claim.
Any kidney or urogenital tract condition or procedure	Any kidney or urogenital tract condition or procedure that is directly or indirectly related to the same underlying condition, medical cause or pathology as a prior claim.
Any eye condition or procedure	Any eye condition or procedure
Any ear condition or procedure	Any ear condition or procedure
Any gastrointestinal disease or procedure	Any gastrointestinal disease or procedure
Any liver disease or procedure	Any liver disease or procedure
Diabetes, diabetes progression, complications of diabetes	Stroke, pancreas transplant, loss of vision, heart attack, cardiac bypass, cardiomyopathy, angioplasty, peripheral vascular disease, renal failure, kidney transplant.
Any condition which is assessed on the basis of an inability to perform <i>activities of daily living</i>	Any condition which is assessed on the basis of an inability to perform <i>activities of daily living</i>

Impact of 14 day survival period for Health Events

If the life insured dies during the first 14 days following a Health Event, the Death benefit is paid instead of the Health Events cover. If the payment is due to death or terminal illness, the Claim Protector provisions do not apply and the policy ceases.

If the Claims Protector provisions are in place and the life insured dies within 14 days of a Health Event the remaining sum insured (without taking into account any adjustments for the Claim Protector provisions) is paid. No payment is made if the remaining sum insured has reduced to zero.

Additional Death cover is paid separately to the Health Events cover.

Cover for Health Events resulting in Total Disability

A major component of the Health Events cover is the inclusion of cover that does not result from the occurrence of a specified event - Activities of Daily Living. General covers are valuable as they do not restrict the payments to those where the events are defined in advance.

All Health Events categories include level of payments based on the level of severity rather than cover based on the disease definition. That is claims based on Severe Impairment can occur from any condition not just the listed Health Events. Events not specifically listed are assessed for claim and the level of the payment using the Activities of Daily Living criteria.

Conventional TPD benefits and Active have the following non-occupational TPD components in common: Significant Cognitive Impairment/ Activities of Daily Living, Loss or limbs, Loss of sight
In addition, Active provides specifically for Musculo-skeletal events including Back and Psychiatric conditions as well as significant impairment for all other non defined events under the Active definition of Activities of Daily Living,

Except for conditions that result from Accidents, we understand that most TPD claims are due to the progression of a disease or condition.

The non occupational and severity approach inherent in Active's Activities of Daily Living criteria removes the need to delay assessment for claim until the condition reaches the level of severity that prevents the insured from performing an occupation.

For occupations that require fine motor skills where a minor impairment could result in a TPD payment under standard TPD contracts, Active incorporates occupational duties under the musculoskeletal body system. This ensures that if the client cannot perform their occupational duties which results in a drop of income by 25% or more, a 100% payment would be made. This is relevant for high earning specialist professions such as surgeons.

Activities of Daily Living

If a health event occurs which is not in the list of defined Health Events and this results in impairment in the ability to perform Activities of Daily Living, a claim can be paid under the Activities of Daily Living Health Event.

There are some significant differences with Activities of Daily Living as a Health Event when compared to the definitions that apply to other Trauma products.

The Activities of Daily living for assessment under Active are:

ADL Category	Specific Activities	Scores required
Self-care	Bathing, Grooming, Dressing, Eating and feeding, Bowel and Bladder function	. 'cannot' in at least one specific activity; or . 'needs help' in at least two specific activities
Communication	Speaking, Writing, Reading, Keyboard use	. 'cannot' in at least one specific activity; or . 'minimal' in at least two specific activities
Physical activity	Intrinsic Standing, Sitting, Reclining, Walking, Stooping, Squatting, Kneeling, Reaching, Bending, Twisting Functional Carrying, Lifting, Pushing, Pulling, Climbing, Exercising	. 'cannot' in at least 3 specific activities; or . 'with help' in at least six specific activities
Sensory Function	Hearing, Seeing, Tactile sensation, Tasting, Smelling	. 'cannot' in at least one specific activity; or . 'minimal' in at least two specific activities
Hand function	Grasping, Holding, Pinching, Percussive movements, Sensory discrimination	. 'cannot' in at least one specific activity; or . 'minimal' in at least two specific activities
Advanced functions	Travel (riding, driving), Sexual function, Social interaction, Understand concepts Memory, Problem solving, Stress adaptation, Sleep pattern, Recreational/ social activities	- 'cannot' or 'poor' in at least four specific tasks

The Activities of Daily Living

Activities of Daily Living (ADL)*	Level of Payment 100%	Level of Payment 65%	Level of Payment 40%
* Unless specifically stated as a measurement tool for a <i>Health Event</i> , the use of the 'Activities of daily living' category will only be applied to a condition that cannot be evaluated under a specific <i>Health Event</i> and cannot be described elsewhere. Supporting objective medical evidence or investigations for each <i>activity of daily living</i> scored must be provided.	Presence of a medically recognised disease or disorder resulting in <i>permanent</i> and irreversible inability to perform 4 out of 6 <i>activities of daily living</i>	Presence of a medically recognised disease or disorder resulting in <i>permanent</i> and irreversible inability to perform 3 out of 6 <i>activities of daily living</i>	Presence of a medically recognised disease or disorder resulting in <i>permanent</i> and irreversible inability to perform 2 out of 6 <i>activities of daily living</i>

Active's Activities of Daily Living is more comprehensive in the sense that the insured needs to be unable to perform 2 ADLs from Self-care, Communication, Physical activity, Sensory Function, Hand function and Advanced functions. It should be noted that most other definitions of Activities of Daily Living included in Trauma products (including Macquarie FutureWise) are restricted to the Self-care function.

Using the assessment criteria, the level of impairment required is significant, but the Active criteria provide a greater range of criteria under which to be assessed increasing the likelihood of a successful claim, albeit not necessarily at the 100% claim level.

Overall Maximum Claim Limit

There is an overall maximum limit on claims over the life of the Active policy: -

Benefit Categories	Maximum combined total payable for claims that are Progressive Conditions	Maximum combined total payable for all Health Event claims
All Benefit levels	\$3M	\$5M
Up to 65% benefit level	\$2M	\$4M

This means that the capacity for additional claims is greater as a percentage of sum insured for sums insured below the maximum initial sum insured of \$3M. These limits are indexed annually to the CPI.

Premiums do not reduce after a claim

Premiums continue at the level that prevailed prior to the claim. This is similar to the situation that applies to more conventional Trauma policies following Reinstatement.

Additional Features

Active includes the following additional features

- Financial Planning benefit (payable once) of up to \$1,000
- Funeral Assistance benefit of up to lesser of 10% and \$15,000 of the remaining cover on death. This benefit is only paid if death and terminal illness cover remains on the policy.
- Cover Indexation
- Future Increases without further health evidence for personal events such as marriage, birth of child, increase in mortgage and salary. Each increase can be between \$10,000 and \$200,000 with an overall increase of \$1,000,000.

3. PRODUCT FEATURES ANALYSIS

As Macquarie Life Active is the similar to other products for additional Death Cover, Child Cover and Income Protection we have focused our product features analysis on Health Events Cover. We have also analyzed the differences between Active and the more conventional risk insurance products in the market. We have done this by comparing Active with Life Insurance with linked TPD and Trauma

- directly by comparing Active with FutureWise
- reviewed the differences between LifeRisk Online overall Product Features scores
- reviewed the differences between Plan For Life Benchmarking Features comparison

These analyses are set out in Appendix 1.

One of the problems inherent in assessing a new product design such as Active is that product research has developed over the last 15 years, aimed at comparing and analysing the existing products in the market.

The products that are currently researched are mainly adviser delivered products which are designed to meet the needs of high income professionals and small to medium business owners. These clients have complex financial protection needs usually focused on financing buy/sell agreements, business and investment loans.

Readers would be aware that there are new product markets developing, in particular:-

- Online direct offers provided by companies such as Allianz, Aussie Home Loans, Guardian Insurance, OnceLife, Real Insurance etc. These products usually provide Life Cover up to \$1.5M, TPD Any Occupation up to \$1M and Trauma for the 4 main events of up to \$500,000.
- Mortgage protection insurance comprising Life Cover and basic income protection
- Insurance offered in association with Master Trusts (Super and Non Super)

Many of the above products, as well as Macquarie Life Active, would not be handled adequately in standard research (which looks at traditional full service adviser delivered products) as their product structures do not directly align with standard product features research rating criteria.

Advisers should consider the needs of their clients carefully in relation to the Active product and compare the range of cover offered and not just the level of cover provided.

We expect that as the Active style of product are released by competitors, that the product research will evolve to address the new product structures and cover provided.

4. PRICING ANALYSIS

Premium Rates have been compared in several ways, so as to analyse the value for money the premium rates provide. The analyses include:-

- Comparison of FutureWise Death, TPD Any Occupation and Trauma premiums and Active
- Comparison of FutureWise TPD and Trauma premiums with Macquarie Active with Life Cover removed
- Comparison of Death, TPD Any Occupation and Trauma with Partial Trauma and Trauma Reinstatement across the Insurance market - FutureWise and Active

Each of these comparisons was conducted across a range of ages 20 to 65 in 5 year steps for each Sex and Smoker combination, stepped and level premiums for sums insured of \$250,000, \$500,000, \$1,000,000 and \$2,000,000. The comparisons also cover each of Macquarie's occupation classes IE, 1, 2, 3 and 4.

Where the tables are too comprehensive to include in the report they are attached as a spreadsheet Appendix 4.

The objective of the analysis was to determine the savings that clients would obtain when compared to more traditional products.

Comparison 1 – Comparison of Active with FutureWise

We have compiled the premium comparisons and have presented some of the comparisons here. Sum insured is presented as '000s.

Male Non Smoker Stepped Monthly premiums – Professional Occupations (Occ Class 1E)

Based on all the premium data compared over the age, sex, smoker, Occupation and stepped and level premiums, the overall premium reductions of Active when compared to FutureWise are:

Overall Premium Reduction	%
Minimum Reduction	12.2
Maximum Reduction	51.7
Average Reduction	23.3

Comparison 2 – Market Comparison of Active with Life Cover with Linked TPD and Trauma

In this comparison we have compared the premiums of Life Cover with linked TPD Any Occupation and Trauma options with Life Cover Personal Insurability included where it is an option and for linked Trauma cover with Partial Trauma and Trauma Reinstatement options added. We have selected these options as they provide the best match to the Macquarie Active product.

In this case we have presented cover for sums insured of \$250,000. We have considered other sums insured (\$500,000, \$1,000,000 and \$2,000,000) and these are available in the Appendix 4 spreadsheet.

Based on all the premium data compared over the age, sex, smoker, Occupation and stepped and level premiums the overall premium reduction of Active when compared to the market are:

Overall Premium Reduction	Comparison to Average %
Minimum Reduction	13.2
Maximum Reduction	44.1
Average Reduction	27.0

Comparison 3 - Active and FutureWise Premium comparison excluding Life Cover

In this comparison we have compared the premiums of Active and subtracted the Life Cover premium. For FutureWise the Life Cover premium was subtracted from the premium for Life Cover with linked TPD Any Occupation Trauma option.

The purpose of this analysis is to more closely compare the cost of Health Events cover and compare the cost to the more traditional Trauma and TPD cover provided by FutureWise.

For this analysis we have presented a range of premiums for a sum insured of \$500,000. These tables are attached as in the spreadsheet Appendix.

50	Male	Non Smoker	3	924.90	653.02	29.4%
50	Male	Non Smoker	4	1068.49	738.2	30.9%

Based on all the premium data compared over the age, sex, smoker, Occupation and stepped and level premiums the overall premium reduction of Active when compared to the market are:

Overall Premium Reduction	%
Minimum Reduction	14.6
Maximum Reduction	57.2
Average Reduction	27.8

Pricing Analysis Summary

Based on the comparison analysis, substantial savings of premiums in the range of 20% to 30% depending on sum insured and occupation class can be achieved if clients use Active instead of more conventional Life cover with TPD and Trauma.

5. SUITABILITY AS AN INSURANCE SOLUTION

The appropriateness or suitability of an insurance product should be considered in relation to its target market. That is, the appropriateness of the product now and in the future for an individual client. As a researcher we are not in a position to know the client, that being the adviser's role, so our approach is limited to one of presenting independent information and analyses.

We have examined some of the main target markets for Life Insurance:- Small to Medium Enterprise Business Owners and High Income Professionals, Home Owners with a Mortgage, Small Business Owners and Self Employed Trades people.

Target Market – Small to Medium Business Owners and High Income Professionals

This target market is a major focus of Life Insurance Companies and Advisers. As a result Adviser distributed products such as FutureWise and its competitor products are largely designed to meet the needs of this target market.

The following options are not available as part of the Active product range:

- Future Insurability without Medical Evidence for Business Events
- Business Forward Underwriting
- Business Expenses Insurance

One of the critical issues for clients in this market is to have certainty of the amount of payment in the event of a claim. Whilst Active does provide claims for a much broader range of Health Events, one of the main purposes of insurance in this market is to provide funds to implement Buy/Sell agreements and repay business and investment loans. As a result Active is likely to be treated with caution as agreements and loan contracts are likely to contain repayment conditions on death and the inability to continue working due to sickness or accident.

Home Owners with a Mortgage

The people that make up this market have more flexible needs as the primary purpose of taking out insurance is to repay their mortgages in the event of not being able to earn an income. They are more likely to be concerned about a cost effective way to protect themselves against being away from work for periods longer than can reasonably be provided for, by sick leave. In addition these people need the flexibility to be able to reduce mortgage debt and provide funds for potentially expensive treatment and rehabilitation.

There are advantages to using Macquarie Active as it provides coverage for a broader range of cover for events that are likely to require significant amounts of time away from work. The insurance payments will result in less stress and more flexibility when reducing ongoing expenses, by paying down or prepaying mortgage payments, providing for drugs not otherwise available at reasonable prices and providing funds to pay for rehabilitation, if funding is not available from other sources.

As a result Macquarie Active is more likely to meet the needs of this market.

Active's lower cost should lead to increased affordability, thereby encouraging higher levels of cover or improving the retention of cover in this price sensitive market.

Small Business Owners and Self Employed Trades people

This market has many of the features that apply to the mortgage protection market except there is likely to be an additional need for income protection cover.

The general comments that apply to the home owners market apply here as well.

5.1 COMPARISON OF PREMIUM RATES AND FEATURE SCORES

In addition to the analysis, we present a table and chart combining the Product Features and Premiums rates. The table is based on

- Male Non Smoker
- Age 35 Next Birthday
- Sum Insured \$1,000,000
- Life Cover with Personal Future Insurability
- TPD Any Occupation rider
- Trauma rider with Partial Trauma and Trauma Reinstatement

Company	Monthly Premium	Overall Features Score
AIA	231.70	8.8
AMP Financial Services	205.59	9.3
Asteron	221.36	9.4
Aviva	201.64	8.6
AXA Australia	213.12	8.1
CommInsure	197.04	8.8
ING Australia	180.44	9.1
Macquarie Life FutureWise	202.02	9.1
Macquarie Life Active	154.04	7.7
MLC	219.38	9.1
TOWER AP	201.88	9.8
Zurich Australia	189.46	9.4
Average	201.50	8.9

Note: AIA includes Crisis Recovery buyback as their Trauma Reinstatement option is an option of this option.

6. ADDITIONAL CONSIDERATIONS RELATIVE TO OTHER INSURANCE PRODUCTS

Macquarie Active has the following key advantages compared to the other policies in the market:

Lower Cost of Cover

The lower cost results in increased affordability encouraging higher levels of cover or improving the likely retention of cover over time.

Broader Protection

- Wider range of Health Events covered provides the insured with broader protection from life's events
- Multiple claims
- Claim Protector 25% of the cover for other Health Events, preserving cover for future events

FutureWise can be taken together with Active

Macquarie Life has indicated that advisers will be able obtain quotations for cover from their quotation software Quick Quote under FutureWise and Active at the same time. This provides Advisers with the opportunity to mix and match cover between the more conventionally structured FutureWise and the Active policy.

Licensees and Advisers will make their own decisions

Some Licensees and Advisers will take the approach that they will use the 'best available' product as a way of minimizing the risks to the client (and to the adviser from a professional indemnity perspective) irrespective of price.

Our view is that once the need for insurance has been established, the decision on the amount of cover is based on a trade-off between the amount and type of coverage versus its cost. As a result we would conclude that a product that reduces the cost of providing financial protection against 'life's events' as well providing a broader level of coverage, deserves careful consideration.

As the protection provided by Active is quite different than more conventional products, Licensees and Advisers should consider the use of this product in detail, so as to determine its applicability for them and their clients.

7. GENERAL COMMENTS

Macquarie Active provides cover in the event of certain health events, Death and Terminal Illness and (non occupational) total and permanent disability. The Active product range also:-

- provides a wider range of cover for Health Events than provided by other products to date
- for the first time serious mental illness and back injuries are specifically covered
- payments are based on the severity of the sickness or accident
- the expanded and redefined Activities of Daily Living provides a broad safety net for conditions not specifically provided for in the listed Health Events
- 20% to 30% saving in premiums is available across a range of ages and occupations when compared to more conventional products.

When taking these factors together Macquarie Life Active has the potential to provide value for money protection for many clients.

8. DATE OF THE REPORT

The report was finalized on 2 June 2010.

APPENDIX 2 PRODUCT FEATURES COMPARISONS

As the Macquarie Life Active is similar to other products for additional Death cover, Child Cover and Income Protection, we have focused our product features analysis on Health Events cover. We have also analyzed the differences between Macquarie Active product and the more conventional premium products in the market. We have done this by comparing Active with Life Insurance with linked TPD and Trauma

- directly by comparing Active with FutureWise
- reviewed the differences between LifeRisk Online overall Product Features scores
- reviewed the differences between Plan For Life Benchmarking Features comparison

1 COMPARISON WITH ACTIVE WITH FUTUREWISE

The main differences have already been alluded to in the product description. These differences are:

	FutureWise	Active - Health Events
Trauma Events	<p>A smaller range of trauma events.</p> <p>Common events not covered such as mental illness, musculo-skeletal (back).</p> <p>Payment level 100% of sum insured (except for Angioplasty and partial trauma events)</p>	<p>Provides a wider range of events that can result in significant time away for work.</p> <p>Varied levels of payment for claims on most events including some of the main events such as Cancer, Heart Attack, coronary artery Bypass and Stroke</p> <p>Events covered such as mental illness, musculo-skeletal (back).</p> <p>Payment levels depend on the severity of the Health event</p>
Partial Trauma Events	<p>A smaller range of partial trauma events.</p> <p>Payment level 20% of sum insured</p>	<p>Partial trauma events including many surgical procedures.</p> <p>Payment level usually 5% of sum insured.</p>
Multiple claim	<p>Restricted availability based on partial trauma and trauma reinstatement for unrelated claims</p>	<p>Built in multiple claim where claims including increasing severity of an existing event can result in increased claim payments</p>
TPD	<p>Full range of TPD options including:</p> <p>Own Occupation</p> <p>Any Occupation</p> <p>Domestic duties</p> <p>Modified TPD (loss of limbs, loss of sight, loss off of 1 limb and 1 eye), loss of independent existence or cognitive loss</p>	<p>Coverage for many of the events that can give rise to a TPD</p> <p>Any Occupation claim are covered. These include:</p> <p>Significant Cognitive Impairment</p> <p>Psychiatric conditions</p> <p>Musculo-skeletal events including Back (assessed using occupation duties criteria and earning capacity after illness or injury)</p> <p>Loss or limbs</p> <p>Loss of sight etc</p> <p>No explicit cover provided for Own and Any Occupation Cover, however Musculoskeletal body system and Activities of Daily Living produces provides general cover for conditions that lead to impairment.</p>

Comparison with Trauma cover

The value of Active needs to be balanced against client needs and in particular whether the broader range of cover and more comprehensive multiple claim aspects of the policy is more appropriate for a client than the larger payout based on a smaller range of trauma events.

For example if the primary purpose of the insurance is to provide protection against the financial impact of a significant period away from work due to a Health Event, then Active provides a broader level of coverage.

However, if the purpose of the insurance is to repay the mortgage if a Trauma event occurs, then Active may not meet this need as well as other products, as the level of payment varies with the seriousness of the Health Event.

Comparison with TPD Cover

The other issue is the level of coverage of the sickness and accidental events that can result in a TPD Any Occupation claim. The issue here is that Advisers need to look to beyond the definitions to the underlying medical conditions that give rise to successful TPD claims.

Some current TPD Any Occupation definitions imply that the underlying level of permanent impairment is one of “permanent disabled due to sickness or accident to the extent of a 75% reduction in capacity to earn an income”.

2 LIFERISK ONLINE OVERALL PRODUCT SCORING

Set out below is a comparison of the FutureWise scores and other Companies, with Active. This scoring is based on overall product scoring methodology developed by Plan For Life for LifeRisk Online.⁴

For Active we have taken the approach that when comparing Health Events and Trauma Events that the scoring process should start where the assessment criteria are the same. We then reduce the score by a full level (e.g. from B to C) if the payment is 65% or 40% when being compared to a 100% payment⁵. Additional deduction applies if the payment is less than 40%. For partial payments we have taken the approach to subtract a full level where the payment is 5% for a 20% partial payment.

This analysis is to show how Macquarie Active would score based on conventional Risk Research methodology.

LIFE COVER SCORE

Company	Death and Terminal Illness	Interim Cover	Exclusions	Cover Indexation	Future Insurability - Personal Events	Future Insurability - Business Events	Total Life Cover

⁴ The Risk Insurance scoring methodology is comprised of 2 parts: Benchmark scores for the features that make up a product and an objective method of combining the scores based on the average cost of the each type of cover - Life Cover, TPD, Trauma, Child Cover, Income Protection and Business Expenses and takes into account the amount of insurance selected. A more detailed overview is available on request.

⁵ The adjusted score allows for the reduced level of payment for the same criteria as well as some credit for a higher level of payment depending on severity.

TPD SCORE

Company	Definition of TPD Any	Exclusions	Interim Cover	Cover Indexation	Future Insurability - Personal Events	Future Insurability - Business Events	Total TPD

3 PLAN FOR LIFE BENCHMARKING - FEATURES SCORES COMPARISON

The main Features of Life Insurance products are analyzed and benchmarked by Plan For Life as part of its Risk Insurance Benchmarking⁶ service that it provides to subscribing Licensees. The methodology adopted is to award scores out of maximum score of 12. This scoring regime is similar to the A, B, C system we have adopted for LifeRisk Online.

⁶ The Risk Insurance Benchmarking report forms the basis of the Association of Financial Advisers (AFA) and Plan For Life, Life Company of the Year awards. These awards recognise overall excellence in product provision and take into account Financial Strength, Product Features, Premium Rates, Service Delivery and Market Performance.

Life Cover

The most noticeable difference between the Life Cover benefit in the Macquarie Life Active product and that in the FutureWise product is the absence of Future Insurability for business events.

Feature	Commentary	Active Score	FutureWise Score
Terminal Illness	The terms and conditions for the Macquarie Life Active Terminal Illness benefit are essentially the same as for the Macquarie Life FutureWise product.	9	9
Future Insurability - Business	The Future Increases benefit does not cover business events, and consequently the score for this feature is zero	0	5.5
Future Insurability - Personal	The terms and conditions for the Macquarie Life Active Future Increases benefit are essentially the same as for the Future Increases (Personal Events) benefit in the Macquarie Life FutureWise product.	6	6
Interim Cover	The terms and conditions for the Macquarie Life Active Interim Cover benefit are essentially the same as for the Macquarie Life FutureWise product.	7.5	7.5

Total and Permanent Disablement

Total and Permanent Disability is normally defined in terms of permanent loss of ability to perform an occupation (whether Own or Any). Such a definition occurs in the Back and Limb impairment event of the Musculoskeletal System section, where reference is made to permanent inability to perform 2 or more core duties (where these duties make up at least 80% of working hours), and inability to earn at least 75% of previous income.

Direct comparison between these types of definition is difficult; however, it is useful to consider the following:

- Standard TPD policies do not specify a minimum number of core duties that must be affected or how many working hours they must involve;
- Standard TPD policies pay the full sum insured for the loss of use of 2 limbs but under the Active contract 65% of Sum Insured is paid
- Standard TPD policies pay the full sum insured for 25% Whole Person Impairment, but under the Active contract 20% of SI is paid for this event

As mentioned previously in this report for TPD, Active needs to be analyzed in terms of the sicknesses and accidents that give rise to permanent disablement and not simply by analyzing the definitions.

Feature	Commentary	Active Score	FutureWise Score
Definition of TPD Own Occ	See discussion above. There is nothing in the Active contract that addresses any of the current criteria for Own Occupation TPD in the Benchmarking.	0	10
Definition of TPD Any Occ	See discussion above. The criteria for Any Occupation TPD take into account general covers such as ADL, WPI, and Loss of Limbs.	3	7
TPD Exclusions	Essentially the same as for FutureWise TPD.	11	11
TPD Interim Cover	Essentially the same as for FutureWise TPD.	6.5	6.5
Stand Alone TPD	Not Available	0	12

Trauma

Macquarie Life Active Health Events cover provides payments that depend on the seriousness of the health event that occurs. To illustrate this, consider the following comparisons between Active and FutureWise for some of the most frequent events:

Event	FutureWise	Active
Cancer	100% of Sum Insured	20% of sum insured, increasing if the cancer progresses beyond Stage I.
Heart Attack	100% of Sum Insured	40% of sum insured, increasing if ventricular ejection fraction reduced beyond certain levels.
Stroke	100% of Sum Insured	5% of sum insured, increasing with inability to perform 2 or more ADLs
Coronary Artery Bypass Surgery	100% of Sum Insured	40% of sum insured

Feature	Commentary	Active Score	FutureWise Score
4 Main Events	See comparison table above. In regard to generosity of payment, each of the major conditions suffers a penalty relative to standard products such as FutureWise.	7	11
Partial Trauma Events	Essentially every event is to some extent a partial payment event, with payment amounts from 5% to 65% of the sum insured.	12	11
Trauma Exclusions	Essentially the same as for FutureWise Trauma Insurance.	10	10
Trauma Interim Cover	Essentially the same as for FutureWise Trauma Insurance.	6.5	6.5
Child Cover	Essentially the same as for FutureWise Trauma Insurance.	9.5	9.5

Child Cover

Child Cover is not assessed in detail for the Risk Insurance Benchmarking however the product and Events covered are the same.

Income Protection

The main features of the Macquarie Life Active Optional Income Cover are the same as those for the FutureWise Disability Income product. Consequently the scores are the same for each product.

Income Protection Plus – Professional Occupations

Feature	Commentary	Active Score	FutureWise Score
Total Disability	As for FutureWise Disability Income	7	7
Partial Disability	As for FutureWise Disability Income	9	9
Exclusions	As for FutureWise Disability Income	6	6
Waiting Period Requirements	As for FutureWise Disability Income	11	11
Offsets	As for FutureWise Disability Income	12	12
Pre-Disability Income	As for FutureWise Disability Income	12	12

Income Protection Plus – Blue Collar Occupations

Feature	Commentary	Active Score	FutureWise Score
Total Disability	As for FutureWise Disability Income	4	4
Partial Disability	As for FutureWise Disability Income	9	9
Exclusions	As for FutureWise Disability Income	6	6
Waiting Period Requirements	As for FutureWise Disability Income	11	11
Offsets	As for FutureWise Disability Income	10	10
Pre-Disability Income	As for FutureWise Disability Income	12	12

	option to reinstate the Trauma Insurance falls. We will then tell you the date Trauma Insurance is reinstated or, if your FutureWise policy has terminated because the total cover under the policy was reduced to nil, we will issue a new policy for the reinstated Trauma Insurance. The premium for the reinstated Trauma Insurance will be based on the FutureWise premium rates applying at the time of reinstatement. Any premium adjustments, exclusions or special conditions, which applied to the original Trauma Insurance, will also apply to the reinstated cover.'				
Conversion to Loss of Independence	After the cover anniversary when the insured person is aged 70, if your FutureWise policy includes Trauma Insurance, the Trauma sum insured is only payable if the insured person suffers loss of independent existence or loss of limbs or cognitive loss before the Trauma Insurance ends, explained in the section titled "When cover ends" on page 25. The Trauma sum insured after the cover anniversary when the insured person is aged 70 is limited to \$2 million across all policies issued by Macquarie Life. Where there are multiple policies issued by Macquarie Life providing Trauma Insurance for the same insured person we will apply any reduction to the sum insured based on the cover start date of each policy (or the start date of any increases, other than indexation increases), reducing the most recently commenced policy (or approved increase) first.	A	Change to Definitions	From the cover anniversary when you are age 70, cover for all Health Events ceases and cover is only provided for: – loss of independent existence. This will be treated as benefit category A; and – death and terminal illness under benefit category AA. From the cover anniversary when you are age 99, cover for loss of independent existence ceases and cover is only provided for death and terminal illness under benefit category AA criteria.	A
Claim Offsets	The Trauma Insurance sum insured will be reduced by the following: . the amount of any Life Insurance paid for terminal illness, if Trauma Insurance is: - included in a Life Insurance Policy; or - connected to a separate Life Insurance Policy through Flexible Linking; and the amount of any TPD Insurance paid, if Trauma Insurance is: - included in a policy along with TPD Insurance; or - connected through Flexible Linking to a separate policy which includes TPD Insurance; and the amount of any Trauma Insurance paid in part for a Trauma Condition. Your policy will show what other types of insurances are included in it, and whether it is connected to another policy through Flexible Linking.	A	Subsequent claims under the policy	LifeRisk Online Commentary There does not seem to be any offsets for other trauma cover under other insurance policies (whether declared or not) Claims limitations such as progressive conditions and limited claim period are relevant here.	A

	aged 65.'				
	NA		Limited Claim Period	<p>As complications from a medical condition, or its treatment, often arise within the months following a condition and it can be difficult to identify all of these complications, a <i>Limited Claim Period</i> applies for 12 months following a <i>Health Event</i> claim.</p> <p>When a claim for a <i>Health Event</i> occurs, a <i>Limited Claim Period</i> starts and lasts for 12 months. If a subsequent <i>Health Event</i> occurs during this <i>Limited Claim Period</i>, any amounts already paid during the current <i>Limited Claim Period</i> will be deducted from the amount we will pay for the current claim. This may result in no benefit being payable for a subsequent condition that falls within the <i>Limited Claim Period</i>.</p> <p>We will not deduct amounts paid for a prior claim for a <i>Health Event</i> within the <i>Limited Claim Period</i> where either the current claim or the prior claim is/was for a <i>Health Event</i> that is the result of <i>accident</i>, unless the <i>Health Events</i> are directly or indirectly due to the same underlying cause or event.</p> <p>Any <i>Health Event</i> that occurs during an existing <i>Limited Claim Period</i> will not start a new 12 month period. However, the next <i>Health Event</i> that occurs outside of a <i>Limited Claim Period</i> will start a new <i>Limited Claim Period</i>.</p> <p>The 12 month period is based on the occurrence of each of the <i>Health Events</i> and not when the claim for that <i>Health Event</i> is paid.</p>

Feature	PDS Extract	LifeRisk Online Score	Feature	PDS Extract	LifeRisk Online Score
Overview - Child Trauma Cover	Child Trauma Insurance provides a lump sum (called the Child Trauma sum insured) if the insured child dies, is diagnosed with a terminal illness or suffers a covered Trauma Condition. Child Trauma Insurance is only available where the child to be insured is the natural, step or adopted child or grandchild of the policy owner. Child Trauma Insurance is only available where the policy owner has, or is applying for, (as policy owner or insured person) at least one other type of policy issued by Macquarie Life, not including Blood Borne Disease Insurance or Child Trauma Insurance. Child Trauma Insurance is not available under FutureWise Super or to trustees of self managed superannuation funds. Provides a lump sum if the insured child dies, is diagnosed with a terminal illness or suffers a covered Trauma Condition.		Child Cover Overview	This is an option for which an additional premium is charged. Child Cover is available if you have, or are applying for Active. The child to be insured must be your natural, step or adopted child or grandchild. When you apply for Child Cover, you select the Amount of Cover (of between \$10,000 and \$250,000) that you want and this applies for each insured child under the policy. We will offer to increase the Amount of Cover, by the indexation rate on each cover anniversary before Child Cover ends, so that it retains its value over time in line with inflation. We will tell you the proposed Indexation Increase before it applies and you can choose not to accept the increase. If you decline an increase it will not affect future increase offers. To decline an increase, we must receive your notice of decline before the applicable cover anniversary.

Superannuation Cover option	<p>This option allows you to have a monthly insured amount that is higher than is usually available under Disability Income Insurance (generally the monthly insured amount can be up to 75% of your income however with this option you can insure up to 80% of your income) so that in the event of disability you can make a level of contribution into superannuation.</p> <p>Part of the monthly benefit will be paid to you and part must be paid to a nominated superannuation fund.</p> <p>The amount you can insure is (subject to a maximum of \$30,000 per month) up to the monthly equivalent of the sum of:</p> <ul style="list-style-type: none"> - the annual income that you contribute to superannuation, to a maximum of 20% of annual income (the Superannuation cover amount); and - the percentage of the remainder of income (that is, annual income less the Superannuation Cover amount determined above), as follows: <ul style="list-style-type: none"> - 75% of the first \$320,000; and - 50% of the next \$240,000. - 20% of the balance <p>subject to the following limits:</p> <ul style="list-style-type: none"> - \$40,000 if the benefit period is 2 years; or - \$30,000 for other benefits periods (plus an additional \$10,000 per month for the first two years of the benefit period). <p>For example, an applicant who earns an annual salary of \$100,000 and has superannuation guarantee contributions of \$9,000 made on their behalf each year. Their annual income is \$109,000 which can be insured as follows:</p> <p>Without Superannuation Cover option Superannuation Cover amount 0 Remainder of income 75 % x 109,000 = 81,750 / 12 = \$6,813 Monthly insured amount \$6813</p> <p>With Superannuation Cover option Superannuation Cover amount 100% x 9,000 / 12 = \$750</p>		Superannuation Cover option	<p>This option allows you to have a higher Monthly Amount of Cover than is usually available under Income Cover (generally the Monthly Amount of Cover can be up to 75% of your income however this option allows you to insure up to 80% of your income) so that in the event of disability you can make a level of contribution into superannuation. Part of the monthly benefit will be paid to you and part must be paid to the trustee of a nominated superannuation fund.</p> <p>The amount you can insure is up to the monthly equivalent of the sum of:</p> <ul style="list-style-type: none"> - the annual income that you contribute to superannuation, to a maximum of 20% of annual income (the Superannuation Cover amount); and - the percentage of the remainder of income (that is, annual income less the Superannuation Cover amount determined above), as follows: <ul style="list-style-type: none"> - 75% of the first \$320,000; - 50% of the next \$240,000; - and 20% of the balance subject to the following limits: <ul style="list-style-type: none"> - \$40,000 if the benefit period is 2 years; or - \$30,000 for other benefit periods (plus an additional \$10,000 for the first two years of the benefit period). 	

FutureWise			Active		
Feature	PDS Extract	LifeRisk Online Score	Feature	PDS Extract	LifeRisk Online Score
	<p>Remainder of income $75\% \times 100,000 / 12 = \\$6,250$ Monthly insured amount \$7,000</p> <p>If the Superannuation Cover option applies, it will be shown in the policy issued to you. The policy will also include a Superannuation Cover percentage which is the proportion of the monthly benefit that will be paid to your nominated superannuation fund (after any adjustment for tax - see below) while we are paying you a monthly benefit under Disability Income Insurance.</p> <p>The Superannuation Cover Percentage is calculated at the time of application and is calculated as the Superannuation Cover amount divided by the monthly insured amount. In the example above, the Superannuation Cover Percentage is worked out as 750 (the Superannuation Cover amount) divided by 7,000 (the monthly insured amount) which equals 10.71%.</p> <p>The monthly benefit, inclusive of any Superannuation Cover amount, is included in your assessable income and will be subject to tax at your marginal rate of tax. We will adjust the Superannuation Cover amount for the potential tax liability that may apply to this amount based on the marginal rate of tax that would otherwise have applied to the last dollar of the insured person's pre-disability income. The tax adjustment amount will be paid directly to you and the Superannuation Cover amount reduced by this tax adjustment amount before it is paid to your nominated superannuation fund.</p> <p>By applying for this option, you agree to provide us with the name and details of your nominated superannuation fund to which the Superannuation Cover amount of your monthly benefit is to be paid. If you do not provide us with a direction at time of claim, we may not be able to pay the Superannuation Cover amount.</p> <p>The amount that we pay to your nominated superannuation fund is a personal contribution and subject to the standard superannuation rules relating to preservation, contributions and tax.</p>

Assessing a claim	<p>Macquarie Life will pay a benefit only after all our claim requirements have been met and we admit liability. To assess the claim, and ongoing payments in the case of Disability Income and Business Expenses Insurance, we will require some or all of the following (to be provided at your expense), in a form that is satisfactory to us:</p> <ul style="list-style-type: none"> . a completed claim form; . your policy; . proof of age of the insured person (unless previously provided); . a certified copy of the death certificate (for death claims only); . evidence of terminal illness, total and permanent disablement, Trauma Condition or disability, whichever is applicable for the claim being made, including test results and medical attendant statements; . financial evidence including evidence of other insurance cover on the insured person's life; . evidence of pre-disability income and post-disability income and any payments received while on claim (for Disability Income Insurance claims); . evidence of income at time of application (and, if we have accepted an application for an increase in cover, the insured person's income at the time you applied for the increase in cover) if Disability Income Insurance is provided on an agreed value basis; and . evidence of pre-disability business income and post disability business income, allowable business expenses incurred and any payments received while on claim (for Business Expenses Insurance claims). <p>Macquarie Life may also require medical and occupational assessments and other information where relevant to assess or finalise payment of the claim. Reasonable co-operation from the insured person and/or claimant is required.</p> <p>All claim payments may be subject to an appropriate specialist physician approved by Macquarie Life verifying the diagnosis. Where we request an examination, assessment or financial audit by a person we nominate, Macquarie Life will meet the cost. Otherwise you must meet the cost of satisfying our claim requirements.</p> <p>For Insurance linked to Life Insurance, if the insured person dies while a TPD, Trauma or terminal illness claim is being assessed, we will finalise assessment of the claim in progress if we have sufficient evidence at the</p>		Making a Claim	<p>We will pay a benefit only after all our claim requirements have been met and we admit liability. To assess the claim, and ongoing payments in the case of Income Cover, we will require some or all of the following (to be provided at your expense), in a form that is satisfactory to us:</p> <ul style="list-style-type: none"> - a completed claim form; - your policy; - proof of your age of (unless previously provided); - a certified copy of the death certificate (for death claims only); - evidence of <i>terminal illness</i>, the <i>Health Event</i> or <i>disability</i>, whichever is applicable for the claim being made, including test results and medical attendant statements (which we will send separately to your treating medical specialist); - financial evidence including evidence of other insurance cover on your life; - evidence of <i>pre-disability income</i> and <i>post-disability income</i> and any payments received while on claim (for Income Cover claims); and - evidence of <i>income</i> at time of application (and, if we have accepted an application for an increase in cover, your <i>income</i> at the time you applied for the increase in cover) if Income Cover is provided on an 'income at application' basis. <p>We may also require further medical and occupational assessments and other information where relevant to assess or finalise payment of the claim. This may include assessment by a <i>medical practitioner</i> nominated by us. Reasonable co-operation from you and/or claimant is required.</p> <p>All claim payments may be subject to an appropriate specialist physician approved by us verifying the diagnosis.</p> <p>Where we request an examination, assessment or financial audit by a person we nominate, we will meet the cost. Otherwise you must meet the cost of satisfying our claim requirements.</p> <p>If the insured person dies while a <i>Health Event</i> or <i>terminal illness</i> claim is being assessed, we will finalise assessment of the claim in progress if we have sufficient evidence at the time of death to establish whether the insured person met the definition for which the original claim was being assessed. If we do not have sufficient evidence at that time to finalise assessment of the claim in progress, the claim will be assessed under the policy terms relating to death.</p>

Financial Advice	Up to \$1000 is payable to reimburse the cost of engaging a qualified financial adviser to prepare a financial plan following full payment of the Life, TPD or Trauma sum insured.	A	Financial Planning	<p>Under this feature, we will reimburse the cost of engaging a qualified financial adviser to prepare a financial plan following payment of a claim for a Health Event, terminal illness or death that falls within benefit category A or B. The total amount payable under this benefit is the lesser of the actual fee paid for the financial planning advice (excluding any commissions received by the adviser) and \$1,000.</p> <p>It is payable on receipt of evidence of:</p> <ul style="list-style-type: none"> - the financial advice provided; - the qualifications of the financial adviser; and - payment made for that advice. <p>This evidence must be received by us within 12 months of payment of the claim. The benefit is payable to the person who receives the claim proceeds. If the claim proceeds are paid to more than one person, the maximum amount payable to each beneficiary for reimbursement of financial planning costs incurred by them will be split proportionally in line with the split of the benefit payment. The benefit is only payable once for the insured person across all cover with us. The financial adviser whose services are being reimbursed must be qualified and operating under an Australian Financial Services License.</p>	B+
Medical Practitioner	A doctor who is legally qualified and registered to practise in Australia (or if outside Australia, has equivalent qualifications and registration) not being you, the insured person, or a business partner or immediate family member of you or the insured person.
