What is this product?

Zurich Blue Performance Fund (the “**Fund**”) is a sub-fund of Zurich Invest ICAV (the “**ICAV**”) constituted as an open-ended umbrella type Irish collective asset management vehicle with segregated liability between sub-funds and with variable capital. The ICAV is domiciled in Ireland and its home regulator is the Central Bank of Ireland (“**CBI**”).

Objectives and Investment Strategy

Objective

The Fund aims to generate capital growth over the medium to long term with a portfolio of assets that is diversified across a range of asset classes.

Strategy

The Fund will invest 80-100% of its NAV in CIS and 0-20% of its NAV in cash and other liquid investments (such as short-term bank deposits and money market instruments). The Fund aims to provide appropriate diversification of the multi-asset portfolio at any point in time through asset allocation of investment exposures of the Fund across multiple asset classes. The reference to “performance” in the Fund’s name reflects that the Fund has a medium to high level of exposure to equity securities.

Asset Type of the Fund	Indicative Percentage of the Fund’s NAV
Collective Investment Schemes (“ CIS ”)	80-100%
Cash or other liquid investments	0-20%

The Fund, through investments in the underlying CIS with a similar investment objective and/or strategy of the Fund, will target a multi-asset portfolio with an approximate exposure of 65% of its NAV to equities and equity related securities, 25% of its NAV to bonds and other debt securities (such as notes and bills), and 10% of its NAV to alternative investments (for instance, listed Real Estate Investment Trusts (“**REITS**”)). The Fund will be actively managed and will not be managed by reference to a particular benchmark or index. The Fund will invest with no prescribed regional, country, industry sector or market capitalization limits for investment by its underlying CIS.

Underlying Exposures of the Fund (via its investment in underlying CIS)	Indicative Percentage of the Fund’s NAV
Equities and equity related securities	65%
Bonds and other debt securities	25%
Alternative investments	10%

The CIS in which the Fund invests may be 1. UCITS or 2. AIFs (Alternative Investment Funds) established in Ireland, other member states of the European Economic Area, the United States, Jersey, Guernsey or the Isle of Man which are eligible for investment by UCITS in accordance with the Regulations and requirements of the CBI. No more than 10% of the Fund’s NAV may be invested in CIS which are non-eligible schemes and not authorized by the SFC (including AIFs). The Fund may invest in one or more CIS which are either authorized by the SFC or eligible schemes. The value of the Fund’s investments in each such CIS may not exceed 30% of the Fund’s NAV. No more than 30% of the Fund’s NAV may be invested in AIFs.

The underlying CIS in which the Fund invests typically may acquire financial derivative instruments for hedging and/or investment purposes. It is expected that the net derivative exposure of underlying CIS in which the Fund invests may be between 0 – 100% of their respective NAV. The leverage of each underlying CIS in which the Fund invests typically must not exceed 100% of the NAV of such underlying CIS calculated using the commitment approach.

The underlying CIS may incur depository fees, administration fees and other operational fees. The Fund will not invest in a CIS where the annual management fee charged to the CIS (excluding performance fee) would be greater than 2% of the net asset value of the CIS. The Fund will also not invest in any CIS which invests more than 10% of its assets in other CIS.

The asset classes in which the Fund invests or is otherwise exposed may be denominated in a wide range of currencies other than USD, the Base Currency of the Fund. As a result, the Fund may have foreign currency exposure. The Investment Manager will exercise discretion in deciding whether or not to hedge all or some of such currency exposures back into the Base Currency of the Fund using financial derivative instruments.

For more information about the Fund's Investment Objective, Investment Policy and Investment Approach, please refer to the Supplement of the Fund.

Use of Derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. The risk factors set out under the heading Risk Factors in the Prospectus and the Supplement apply to the Fund, please refer to the Prospectus and the Supplement of the Fund for details.

1. Investment risk

The Fund and/or the underlying CIS's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Risks associated with investments in underlying CIS

The Fund may invest in other CIS and will be subject to the risks associated with the Fund's underlying CIS. The Fund does not have control of the investments of the underlying CIS and there is no assurance that the investment objective and strategy of the underlying CIS will be successfully achieved which may have a negative impact to the NAV of the Fund.

The underlying CIS in which the Fund may invest may not be regulated by the SFC. There may be additional costs involved when investing into these underlying CIS. There is also no guarantee that the underlying CIS will always have sufficient liquidity to meet the Fund's redemption requests as and when made.

3. Risks associated with the Fund's investments and/or through investments in underlying CIS

a. Currency risk

The investments of any CIS in which the Fund invests, may be acquired in a wide range of currencies other than the base currency of the Fund. Changes in the exchange rate between the

base currency of the Fund and the currency of the investments of the underlying CIS may lead to a depreciation of the value of the Fund's assets as expressed in the Fund's base currency.

b. Risks associated with equities and equity related securities

Equity market risk

The value of the underlying CIS's investment in equity securities and therefore indirectly the value of the Fund's investments is subject to general market risks, as the value of such equity securities and therefore the Fund's value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

c. Risks associated with Financial Derivative Instruments ("FDI")

The Fund may be subject to risks associated with FDI acquired by the Fund and by the underlying CIS in which the Fund invests including counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI. Exposure to FDI may lead to a high risk of significant loss by the Fund.
