Revision of Tabarru' Charges for <Current Plan Description> (<Current Plan Code>)

Dear Valued Customer,

Thank you for your continued support of Zurich Takaful Malaysia Berhad ("ZTMB").

We understand that rising medical and healthcare costs in Malaysia are a growing concern. Several significant trends, such as the surge in non-communicable diseases, the expansion of private healthcare services, and the continuous rise in medical inflation, have greatly impacted the medical and health sector.

Despite our persistent efforts to contain costs through various initiatives, these expenses continue to escalate annually. Our initiatives include reviewing and comparing claims across diverse hospitals and conducting in-depth analysis of medical bills to ensure charges are reasonable. At ZTMB, we are committed to providing you with long-term protection. As part of this commitment, we actively manage your Tabarru' charges to ensure you maintain the medical coverage you need. In light of this, we would like to inform you that we will be revising the Tabarru' charges and contributions for your medical plan.

Following the announcement by Bank Negara Malaysia (BNM) on 20 December 2024, relating to the introduction of interim measures for medical plans, we remain dedicated to assisting our certificateholders in managing the challenges posed by the rising costs associated with high utilisation and medical claims inflation.

To assist you during this transition, we will implement a gradual increase in your Tabarru' charges (refer to Appendix 1) over a five-year period.

With the revision, more units will be taken from your Participant Investment Account to pay for the higher tabarru' charges. If you continue to pay the same contribution RM <Current Regular Contribution> < Payment Mode Description > after this revision, your certificate is expected to sustain up to age Age,<1 day before lapse date DD MMM YYYY>.

You can consult your wealth planner for other alternatives stated below:

- a) If you wish to make a different amount or method to sustain your certificate.
- b) Downgrade your current plan of medical rider, if applicable.
- c) Review your coverage by reducing your certificate benefits i.e. reduce sum covered and/or remove other rider(s).
