**FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.**

<sup>1</sup> For the Eagle funds, the fund price and performance is shown in sterling.

<sup>2</sup> Please note this fund is only available in the Middle East region. For investments into these funds, the fund manager may at their discretion, make payments based on the value of holdings in the funds to certain financial adviser firms. In the case of these funds, a distributor fee may be paid from the fund charges disclosed to you and rebated to the introducing broker via a commission sharing arrangement. Irrespective of any such arrangement, the fee paid by investors into the relevant share class of the underlying fund is the same and all investors rank equally with each other. Stated fund prices are inclusive of all such fees and relevant fund related charges. If these charges are relevant in your case, your financial adviser should make these clear to you. Applications are subject to compliance with local regulations.

<sup>3</sup> This fund is a hedged share class which aims to provide investors with a return correlated to the base currency performance of the fund, by reducing the effect of exchange rate fluctuations between the base and hedged currency. It is important to note that the hedge is not perfect - it aims to reduce, not eliminate, currency risk.

<sup>4</sup> The manager of this fund may deduct a performance based fee from this fund. This charge is additional to the total yearly charge shown. For further information please refer to the fund manager's literature.

<sup>5</sup> The annual management charge (AMC) quoted, contains an additional charge that is deducted by the Management Company to cover the fund's ongoing distributor/ servicing/ maintenance costs. These charges may be listed separately to the AMC in the fund's prospectus but for the purposes of this bulletin are displayed collectively. This is not the funds total expense ratio/ongoing charge figure.

<sup>6</sup> As the fund employs both long and short strategies, extreme market conditions could theoretically expose the fund to unlimited losses. Such extreme conditions could result in little or no growth and may result in losses to your original investment. Only investors seeking long-term growth over a five to ten year horizon with at least moderate volatility should consider this fund. With every investment, there is a risk to your capital and you may not get back what you originally invested.

<sup>7</sup> This fund is not available in the Middle East region.

<sup>8</sup> This underlying fund is created through a daily currency switch into SGD from the USD share class of the same fund. It is therefore exposed, daily, to currency exchange rate fluctuations between SGD and USD and investors should be aware of the presence of this currency exchange risk before investing.

<sup>9</sup> The ZI HSBC BRIC Equity fund was closed to new business on 01 April 2010. Existing investments in this fund are unaffected.

<sup>10</sup> The Zurich Allocated Passive Funds are only available for the Futura and Lifelong Products.

<sup>11</sup> Due to the ongoing conflict between Russia and Ukraine, market trading conditions continue to be impaired. As a result, all trades within the underlying fund and its daily price calculation are suspended until further notice.

<sup>12</sup> Following the suspension of trading, the Annual Management Charge has been waived by the Fund Manager.

<sup>13</sup> Due to the ongoing conflict between Russia and Ukraine, this Fund has been created for the purposes of holding Russian assets and will be liquidated upon the disposal of the Russian assets.

Past performance is not a guide to future performance. The value of any investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

**FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.**

<sup>1</sup> For the Eagle funds, the fund price and performance is shown in sterling.

<sup>2</sup> Please note this fund is only available in the Middle East region. For investments into these funds, the fund manager may at their discretion, make payments based on the value of holdings in the funds to certain financial adviser firms. In the case of these funds, a distributor fee may be paid from the fund charges disclosed to you and rebated to the introducing broker via a commission sharing arrangement. Irrespective of any such arrangement, the fee paid by investors into the relevant share class of the underlying fund is the same and all investors rank equally with each other. Stated fund prices are inclusive of all such fees and relevant fund related charges. If these charges are relevant in your case, your financial adviser should make these clear to you. Applications are subject to compliance with local regulations.

<sup>3</sup> This fund is a hedged share class which aims to provide investors with a return correlated to the base currency performance of the fund, by reducing the effect of exchange rate fluctuations between the base and hedged currency. It is important to note that the hedge is not perfect - it aims to reduce, not eliminate, currency risk.

<sup>4</sup> The manager of this fund may deduct a performance based fee from this fund. This charge is additional to the total yearly charge shown. For further information please refer to the fund manager's literature.

<sup>5</sup> The annual management charge (AMC) quoted, contains an additional charge that is deducted by the Management Company to cover the fund's ongoing distributor/ servicing/ maintenance costs. These charges may be listed separately to the AMC in the fund's prospectus but for the purposes of this bulletin are displayed collectively. This is not the funds total expense ratio/ongoing charge figure.

<sup>6</sup> As the fund employs both long and short strategies, extreme market conditions could theoretically expose the fund to unlimited losses. Such extreme conditions could result in little or no growth and may result in losses to your original investment. Only investors seeking long-term growth over a five to ten year horizon with at least moderate volatility should consider this fund. With every investment, there is a risk to your capital and you may not get back what you originally invested.

<sup>7</sup> This fund is not available in the Middle East region.

<sup>8</sup> This underlying fund is created through a daily currency switch into SGD from the USD share class of the same fund. It is therefore exposed, daily, to currency exchange rate fluctuations between SGD and USD and investors should be aware of the presence of this currency exchange risk before investing.

<sup>9</sup> The ZI HSBC BRIC Equity fund was closed to new business on 01 April 2010. Existing investments in this fund are unaffected.

<sup>10</sup> The Zurich Allocated Passive Funds are only available for the Futura and Lifelong Products.

<sup>11</sup> Due to the ongoing conflict between Russia and Ukraine, market trading conditions continue to be impaired. As a result, all trades within the underlying fund and its daily price calculation are suspended until further notice.

<sup>12</sup> Following the suspension of trading, the Annual Management Charge has been waived by the Fund Manager.

<sup>13</sup> Due to the ongoing conflict between Russia and Ukraine, this Fund has been created for the purposes of holding Russian assets and will be liquidated upon the disposal of the Russian assets.

Past performance is not a guide to future performance. The value of any investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested.

## The Eagle

The Eagle currency is a basket of four globally recognised currencies. Whilst the Eagle is designed to spread currency risk, it cannot remove volatility and the value of the Eagle exchange rate, like any currency, can change daily. Each Eagle is made up of 1 sterling, 2 US dollars, approximately 2.05 euros plus 500 Japanese yen.

The Eagle is currently worth (buying price) as at 31 May 2025

USD	9.23	GBP	6.85
-----	------	-----	------

**It must be remembered that the value of the Eagle can fluctuate and past performance is not a guide to future performance. The value of any investment and the income from it can fall as a result of market and currency fluctuations and you may not get back the amount originally invested.**
