

# Zurich Risk Profile Funds

## Elevate your investments

### The Zurich Risk Profile Funds

Zurich working with **index funds** to provide you an intelligent investment option: **The Zurich Risk Profile Funds.**

Zurich Risk Profile Funds offer a diversified blend of equities, built using **cost-efficient index funds**. This means you will benefit from a diverse, professionally constructed portfolio in a single fund.

### Meet the fund range!

Available in **US dollar, Euro and Sterling** (or USD, EUR and GBP)

	1	2	3	4	5
Equities	20%	40%	60%	80%	100%
Bonds	80%	60%	40%	20%	0%

Each of the five funds offers a different blend of equities and bonds. All you need to do is choose the fund that best suits your investment goals and risk profile.

### Benefits of the fund range

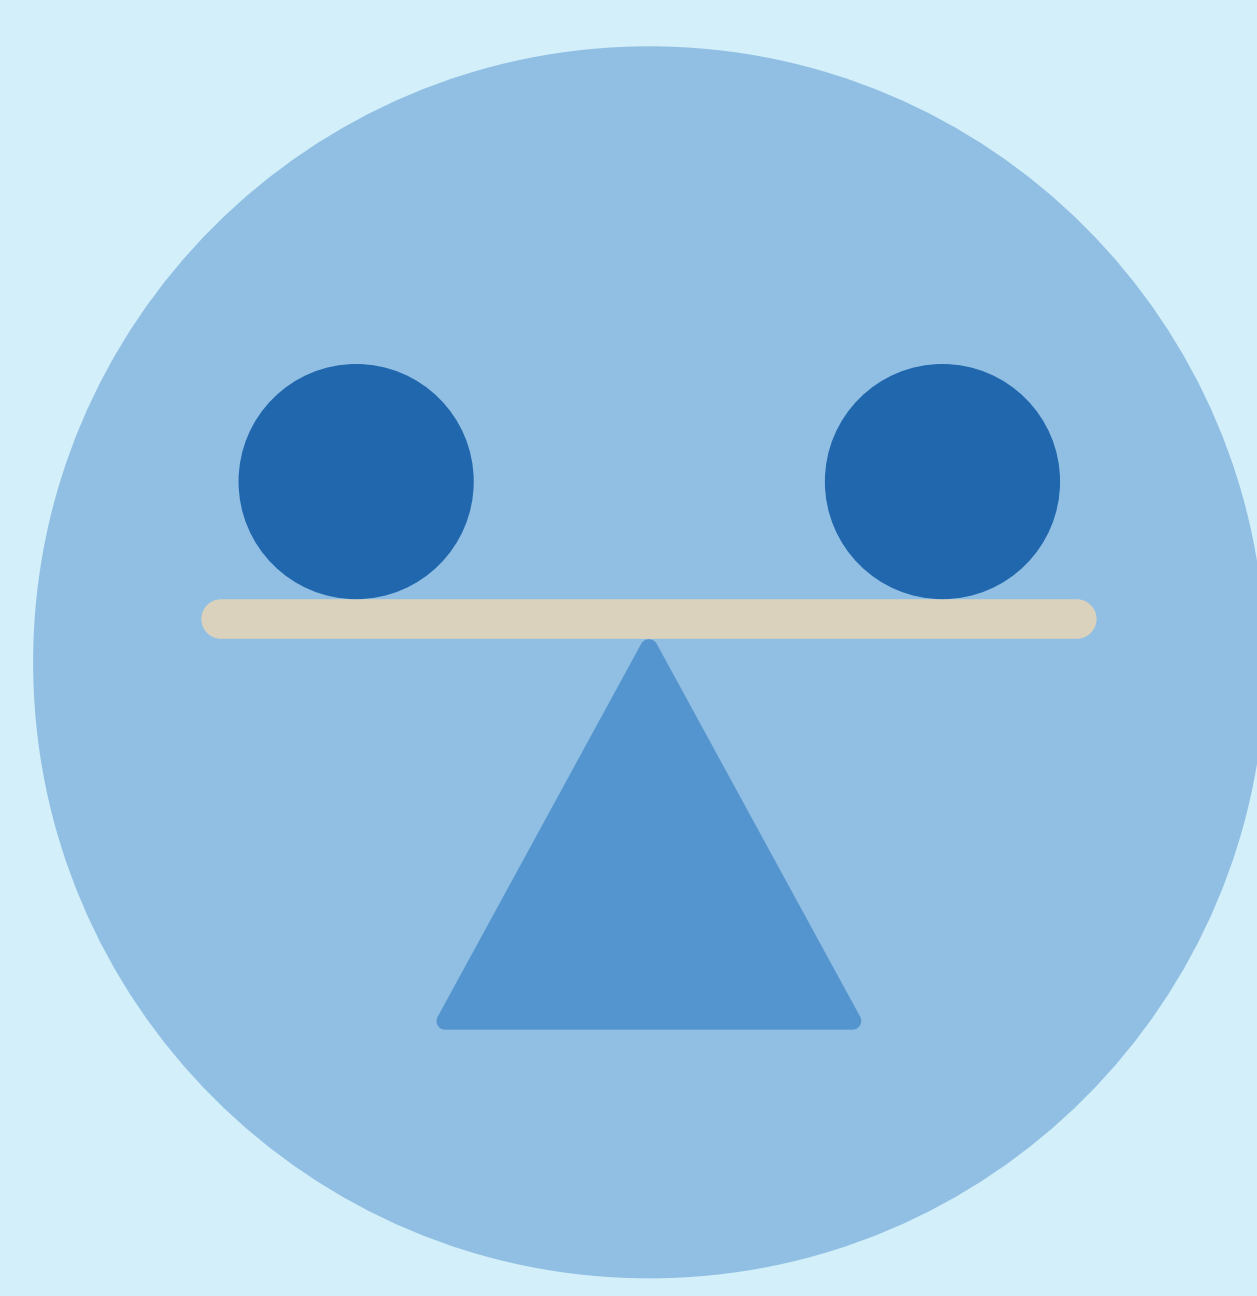

**1 Cost effective**  
Built using low-cost index funds at a cost of only 0.24%.

**2 Broad diversification**  
Maintains exposure across all key asset classes and regions.

**3 Low maintenance**  
Provides exposure to a well-balanced mix of equity and bond investments.

**4 Regular rebalancing**  
Keeps the portfolio in line with your investment goals.

### Understanding the difference between passive and active investment

#### Active

**Performance potential**  
Successful active funds can deliver returns in excess of the market over the long term.

**Diversification**  
Although active funds normally hold fewer investments than passive funds, our active portfolios still hold a wide range of securities.

#### Passive

**One-stop shop**  
You can access entire markets with one investment.

**Diversification**  
Index funds often hold hundreds or even thousands of shares or bonds.

**Low cost**  
Index funds are not trying to beat the market, so you are not paying countless researchers to analyse companies and performance.
