

# Zurich Cyber Complete

Are you getting the most out of your cyber insurance solution? In partnership with Zurich Resilience Solutions (ZRS), Zurich Insurance is now offering either Cyber Health Check or Cyber Incident Response Exercise to policyholders at no additional cost.

## Cyber Health Check

Undertaking a gap analysis is an essential step in any cyber risk management strategy as it pinpoints strengths and weaknesses in the current approach. The Cyber Health Check considers risks across three dimensions - exposures, hazards and controls - and identifies improvements that will enhance organisational cyber resilience.

Here are some of the key benefits:

- Understanding gaps in cyber maturity
- Provides a practical roadmap to improve cyber risk management
- Can be used to garner senior management buy-in for future cyber programmes

## Cyber Incident Response Exercise

A Cyber Incident Response Exercise helps organisations improve their cyber incident response capabilities, by running a tabletop exercise to identify areas for improvement before an incident happens for real.

Here are some of the key benefits:

- Heightens stakeholder awareness of roles and responsibilities should an incident happen
- Tests the versatility of plans against a range of scenarios
- Identifies gaps in processes to improve efficiency of response
- Gives an objective and independent view of preparedness for an incident
