

# Zurich Smart Permit

Zurich Smart Permit was co-created with customers and contractors and is a web-based solution for managing permits associated with construction and maintenance work, removing the need for paper permits, and providing a reliable audit trail.

- » By simply scanning a QR code and digitally answering permit questions, the contractor can quickly send a comprehensive permit to the site manager for approval from their mobile or tablet
- » The online dashboard conveniently stores all the permit information for site managers, offering a one stop shop to approve, deny, view and report on permits across multiple permit types and site locations
- » Smart Permit provides a real-time view of all work taking place including work status updates, permit extensions, and photos of the work
- » Intelligent SMS and email notifications are used to keep all parties up-to-date
- » The Smart Permit application has been designed by experts in risk management and will help organisations manage any works with their contracted suppliers in a seamless, easy, and auditable manner.

Smart Permit is currently available free of charge to customers with properties insured by Zurich.

Eligible customers can register for Smart Permit by completing this short form:

<https://www.zurich.co.uk/business/our-expertise/risk-engineering/smart-permit/registration>

Once you've registered, you will receive an email from Okta prompting you to create a password for your account. You can then log-in and start using Smart Permit.

For more information, you can visit our website at <https://www.zurich.co.uk/business/our-expertise/risk-engineering/smart-permit>.

If you have any questions or require any assistance, please get in touch via [smartpermit@uk.zurich.com](mailto:smartpermit@uk.zurich.com).
