

Construction Risk Management

Zurich Resilience Solutions has world class expertise in all areas of construction and a truly global network to deliver this expertise

We provide comprehensive risk engineering services for a broad spectrum of construction projects across multiple insurance lines of business

We can provide an array of services that extend beyond the usual scope of risk engineering where our aim is to reduce the risk profile of a project to benefit all parties involved

Our Capability

We possess an array of unique experience that enables us to service a wide range of construction projects across different sectors. This includes buildings, large infrastructure projects, mining, molten metals, oil, gas and petrochemical and power generation (traditional and renewable).

We can assess the risk profile through the whole construction lifecycle from the enabling works through to the testing and commissioning and operational readiness.

Our Insurance Interests

The insurance coverage we can provide assistance with includes Construction All Risk (CAR / Builders Risk, Erection All Risk (EAR) and Civil Engineering Completed Risks (CECR).

We also provide assistance on operational coverage and provide risk engineering continuity across the assets whole life.

Our People

Our risk engineers have extensive industry experience and are all qualified with the relevant technical bodies.

Zurich Resilience Solutions has an inherent collaborative culture where our people work closely with not only within risk engineering, but also with our claims and underwriting colleagues to deliver optimal solutions for the project.

Our Reach

Zurich Resilience Solutions has Construction and Energy Risk Engineers located across the globe. We have risk engineers in the UK, Europe, Middle East, South America, North America, Australia, and Singapore.

We pride ourselves on being able to service most projects using local risk engineers and who also have access to our global knowledge.

Our Services

We can an insight into your risk profile across all project phases. Our services include:

- Design Workshops
- Underwriter Submission Reports
- Project Exposure Assessments
- Risk Engineering Surveys
- Project Information Review

We can use our industry experience, our exposure to a variety of projects and access to loss information to provide valuable insight that can benefit your project.

Your Benefits

Working together, we can help our customers can realise significant benefits, including:

- Provide the project and client with a holistic risk engineering approach to risk mitigation across the whole life cycle of a project / asset
- Aim to improve the risk profile of a project and reduce potential losses

For more details on any of our risk solutions, please speak to your usual Zurich contact or email: sam.richardson@uk.zurich.com
