

Oil, Gas & Petrochemical Risk Management

Zurich Resilience Solutions (ZRS) has expertise in all areas of Oil, Gas and Petrochemicals (OGP).

We have a network of Risk Engineers based in the main global energy hubs of the UK, North America, the Middle East and Singapore.

Industry Knowledge

ZRS OGP Risk Engineers are experienced Chemical and/or Process Safety Engineers, with significant experience gained in a wide range of industry backgrounds including Exploration & Production, Refining, Petrochemicals, Design, Engineering Consultancy and Technology Licensing.

This means we have a truly deep understanding of our customer's operations and the challenges they face. This allows us to work collaboratively and in a pragmatic way.

Multiple Lines of Business

We work across multiple lines of business, including Upstream and Downstream Energy, Casualty, Construction and Environmental Impairment Liability. This allows us to offer a comprehensive service to our clients across all of their assets, future acquisitions and major CAPEX projects.

Market Leaders & Trusted Partners

We have a long history of providing market leading risk engineering to major clients within the OGP sector. By leveraging our global network of industry specialists, we can service very large and complex accounts in a consistent and high quality way. We strive towards developing close working, collaborative relationships with our customers and to become 'Trusted Partners'.

Operational Insurance Risk Engineering

Detailed and bespoke exposures & risk grading

Identifying and assessing location and facility specific exposures and risk management frameworks to enable consistent grading for all operational facility classes.

High accuracy loss estimation for named perils

Harnessing knowledge from historical losses and proven technical methods to estimate losses resulting from fires, explosions, critical equipment & machinery breakdown and other events.

Case study losses & learnings for the future

Analysing key historical losses and their major causal factors to identify lessons learnt to prevent future reoccurrence.

Continuous risk quality improvement

Utilising risk grading to deliver rational, effective and targeted risk improvement actions to enable customer risk quality improvement.
