

Accident Investigation and Claims Defensibility

An effective health and safety management system should include effective accident investigations.

Whilst it is not always possible to defend all claims, this course will assist in understanding your legal responsibilities and give practical guidance to accident investigations and improving claims defensibility.

Training Overview

This half day course can be delivered virtually or in person. It can be tailored to incorporate your systems and procedures and will include practical exercises.

This course covers:

- Legal responsibilities and relevant health and safety legislation
- Key aspects of near-miss, incident and accident reporting
- The importance of key documentation and procedures
- How to collate, manage and analyse information to carry out effective investigations
- Awareness of Claims defensibility

Other training

You might also be interested in:

- Health and Safety Awareness Training
- Risk Assessment Training
- Fire Awareness Training
- Introduction to Behavioural Safety Training
