

Desktop Review

A desktop review will undertake a basic review of potential liability risk exposures and the controls in place to mitigate these.

Overview

- A desktop review of health and safety documentation
- A report will be provided with an opinion on the risk based on the documentation provided which may include recommendations for further improvements

Approach and philosophy

The Desktop Review will consider:

- Typical risks associated with the industry and work activities
- Existing arrangements to mitigate risks
- Identify areas where additional information may be required to assess how risks are being controlled

Information, Records and Other Documents

Electronic copies of the following documents and information may be required:

- Renewal submission/business overview
- Arrangements section of health and safety policy
- Health and safety strategic plans
- Sample risk assessments/safe systems of work
- Details of inspection/monitoring procedures
- Accident data including serious accident information, trends and problem areas

Further information/related services

We can also offer:

- Employers Liability Assessment
- Public Liability Assessment
- Product Liability Assessment

The duration of the assessment will depend on the range of activities and the number of locations as this will include a site visit as well as a closing meeting to discuss our findings and a detailed report outlining our findings and any suggested areas for improvement.

Zurich Risk Advisor

Our free-to-use app allows customers to undertake a basic assessment of their existing arrangements for managing liability risks as well as providing guidance for improvements and insight on related topics.
