

Property Risk Management and Loss Control Services

Building operational resilience to
thrive during turbulent times

Extreme weather. Natural hazards. Fires. Equipment failures. Cyberattacks. These are just a few of the threats facing businesses today.

Zurich Resilience Solutions helps customers identify, quantify and prioritize risks. We help you understand your exposure and take action to become more resilient during challenging times.

The challenges that test your business the most are the ones that are unexpected. Facility fires, cyberattacks, equipment failures, supply chain disruptions, extreme weather and emergency events can have long-lasting repercussions on your people, property, operations and customers.

ZRS offers services to help safeguard your operations against interruption risks. Our team specializes in tailored plans, services and insights to help ensure the uninterrupted flow of your business, including:

- Private fire protection assessment and sprinkler services
- Water damage mitigation
- Business Continuity solutions
- Supply Chain services
- Emergency Response and Crisis Communication solutions
- Cyber Risk services
- Jurisdictional Servicing to help ensure equipment meets regulatory and safety standards
- Refrigeration Interruption Surveys
- Fuel Fired Equipment Surveys
- Boiler Management Training

Tailored services

We work closely with you to analyze the business at risk and provide recommendations to maximize your risk management investment. We provide property-specific guidance and technical insights to help you identify, address and mitigate risk, and reduce loss costs.

A few of the ways we support you

- Conducting property assessments and reviews, identifying vulnerabilities to critical elements of internal and external operations
- Improving and fostering cost-effective resilience through targeted mitigation measures, in close cooperation with your team
- Providing services before loss events as well as after a claim to support a faster recovery
- Delivering fire and water damage prevention and mitigation services
- Strategic and operational supply chain design, e.g., when enlarging capacity in a production network
- A comprehensive evaluation of equipment and operational processes to identify potential risks and vulnerabilities

Menu of Services

Risk grading and industry benchmarking

Fire protection courses

Loss investigations and analysis

Natural hazards exposure assessment

Infrared services

Consultative project and plan review services

Fire protection impairment management

Water leak detection services

Location valuation services
