

Climate Spotlight

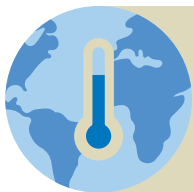

Helping organizations identify and build resilience to future physical and operational risks

Zurich Resilience Solutions' (ZRS) NEW Climate Spotlight solution helps customers identify and map their climate risks, quantify the impact to their organization and make informed critical capital allocation decisions.

Climate Spotlight features an interactive visual climate risk dashboard that uses ZRS' proprietary climate data and market-leading risk analysis methodology to help organizations chart evolving climate risks, model future climate scenarios, quantify impacts, and make confident investment and adaptation decisions. Using our tool, customers can understand their risks at the portfolio level down to the location level, and take action to build resilience to climate impacts now and in the future.

Features

Maps risk for 10+ climate perils

Flood (pluvial and fluvial), Storm Surge, Precipitation, Hail, Wind, Heat, Cold, Drought, Tornado, Sea Level Rise

Runs best-to-worst-case climate scenarios

SSP1-2.6 (<2°C), SSP2-4.5 (~2°C), SSP3-7.0 (~3.6°C), SSP5-8.5 (>4°C)

Plots different future time horizons up to 2100

Current, Near-term (~2030), Mid-term (~2060), Long-term (~2090)

Quantifies impact on assets, values, people and revenue

Helps leaders make critical capital allocation decisions

Climate Spotlight is available via two products

Climate Spotlight 'Core'

- Self-service
- Up to 100 locations
- Results in minutes

Climate Spotlight 'Expert'

- Tailored inputs
- Infinite locations
- Climate expert analysis

Side-by-side product comparison

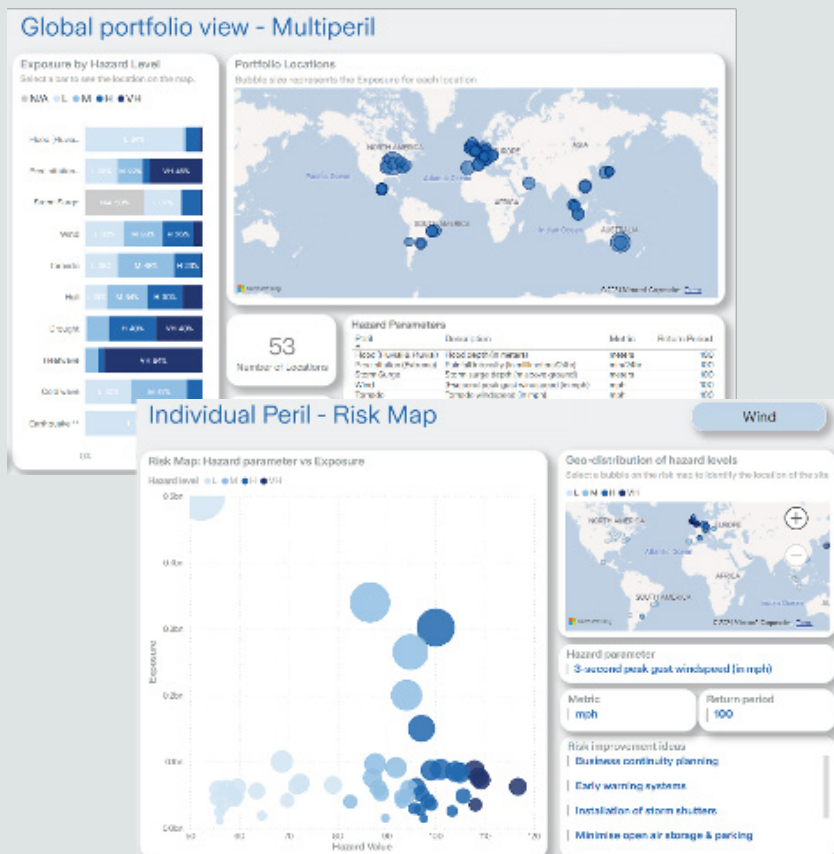

Core

- Easy-to use, self-serve
- Suitable for organizations of all sizes
- Fast, flexible and affordable way to identify exposures, adapt business and tackle reporting
- Simply add new locations which are immediately updated within the risk dashboard for a live view of climate risk exposures
- Upload site location data (for up to 100 different sites) to produce your interactive climate risk dashboard in as little as a few minutes
- Priced flexibly based on the number of locations
- Ideal solution for organizations that would like to take a phased approach to analyzing climate risk.

Expert

- A fully customizable and consultative product to meet the individual and often complex needs of an organization
- Performed using the business metrics of an organization's choice (e.g TIV, Revenue, Supplier Criticality), allowing for selection of different metrics for different parts of businesses
- Collaboration with a climate risk expert who provides consultation throughout and helps to communicate key insights to internal stakeholders
- Customized and detailed written report provided by climate experts

Climate Spotlight Outputs

Benefits

- Identifies highest risk locations to prioritize for detailed risk assessments and requisite adaptation measures
- Key inputs for climate related disclosures
- Supports stakeholders' strategic approach to climate adaptation by prioritizing actions and investments
- Supports robust business continuity planning and financial impact analysis on key climate perils
- Tier one supplier and local infrastructure exposures

What makes ZRS Climate Resilience Solutions different?

We are Risk Specialists

As the risk consulting arm of Zurich Insurance, we draw on the organization's technical strength and depth. With this proven expertise, we advise customers on ways to mitigate natural hazard-related risks— and anticipate how climate change will impact their business for years to come.

With End-to-End Climate Services

We provide a portfolio-level analysis combined with location-specific assessments including the broader value chain. With this holistic view, customers can manage climate-related risks and collaborate with stakeholders (e. g., operations, sustainability teams) more effectively.

Using Zurich-developed Climate Data

Our forward-looking climate data is drawn from the high-quality data developed for Zurich's insurance business. Customers have transparency into underlying assumptions and methodologies, so we can adapt services based on their risk and reporting priorities.

Addressing TCFD & CSRD Requirements

Our climate risk analysis aligns to climate risk disclosure frameworks and regulatory requirements (e.g., TCFD, CSRD, streamlining inclusion of key risk data).
