

# Ergonomics Services

Promoting safety, productivity  
and profitability

Ergonomics offers a high ROI by reducing injury risks and boosting efficiency.

Companies can see a \$2 to \$10 return for every dollar invested through lower healthcare costs, fewer workers' compensation claims, and increased productivity.<sup>1</sup>

Zurich Resilience Solutions' (ZRS) ergonomics solutions help businesses increase employee well-being, reduce workplace injuries, boost productivity and lower costs.

We offer customized ergonomic assessments and targeted interventions to create safer, more efficient work environments, protecting employees from musculoskeletal disorders (MSDs) and improving morale.

#### Where to start

Our ergonomics specialists are committed to understanding a company's specific ergonomic needs. We begin by meeting with you to gain a comprehensive understanding of your unique requirements. This personalized approach allows us to tailor our ergonomic solutions precisely to your needs, ensuring you receive the most effective and relevant offers for your organization.

By starting with a detailed assessment and open dialogue, we can develop a customized ergonomics program that enhances employee well-being and productivity while reducing the risk of work-related injuries.

#### Benefits of Ergonomic Improvements

##### Reduced injuries

Ergonomic interventions help reduce the risk of MSDs, improving worker health and lowering injury-related costs.

##### Increased productivity

Ergonomic solutions can streamline workflows and enhance efficiency by designing tasks and workplaces to fit employee capabilities.

##### Improved employee morale

Comfortable workspaces help improve focus, reduce fatigue and increase job satisfaction, which can result in higher retention rates.

##### Regulatory compliance

Ergonomic assessments help businesses meet health and safety standards, mitigating legal risks and avoiding costly fines.

ZRS safeguards employee well-being from on-boarding to retirement. Integrating ergonomics into workplace design and processes promotes safety, operational continuity and talent retention while minimizing injury-related disruptions.
