

Property Risk Engineering and Loss Control Services

Extreme weather is increasing the risk of property loss

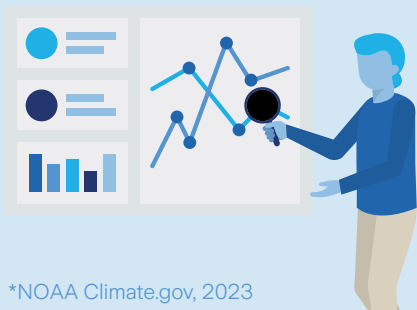

\$93B

Property damage costs from natural disasters in the United States in 2023*

Property Risk Management

Get actionable expertise to help protect your assets, reputation, and market share. With detailed assessments, risk gradings, and location benchmarks, we provide the tools and solutions you need to make confident financial and operational decisions and face the future prepared.

*NOAA Climate.gov, 2023

Protecting your physical assets is crucial to maintaining the continuity and profitability of your business. Zurich Resilience Solutions (ZRS) understands the costly impact that extreme weather and other risks can have on your property and operations.

ZRS **property risk assessments** provide businesses industry-specific information and data-led insights to identify and mitigate property risk. Our team provides efficient and cost-effective solutions tailored to clients' needs. We research site-specific and emerging property hazards or exposures and perform root-cause analysis to learn from past loss cases.

Global coverage and market access

With a vast network of Risk Engineers working across 40 countries and access to a worldwide network of technical expertise, ZRS is ready to help your business wherever it operates. ZRS services that help identify supply chain vulnerabilities can help reduce international risk exposures even if your company's properties are entirely based in the U.S. We can designate regional Risk Engineering resources and help keep you informed of any local compliance-driven risk mitigation requirements.

Risk Assessment Services

- | | |
|---|---|
|  Risk grading and industry benchmarking |  Fire protection courses |
|  Natural hazards exposure assessment |  Infrared services |
|  Fire protection impairment management |  Water leak detection services |
|  Consultative project and plan review services |  Location valuation services |
|  Loss investigations and analysis | |

Designated Account Engineer

ZRS Account Engineers provide personalized property risk management support, serving as the central contact for property loss prevention needs. Our risk engineers develop an in-depth understanding of each customer's business, identify potential risks, and coordinate prevention activities. Customers benefit from ZRS' technical expertise as they stay informed of progress and emerging issues and coordinate reviews on construction projects, fire protection systems and fuel-fired equipment.

Additional Services Available

Climate Resilience Services

The increasing frequency and severity of natural hazard events we're seeing today is impacting businesses and communities worldwide. ZRS offers a wide range of risk assessment services to support businesses in understanding climate risks, identifying adaptation measures and building resilience against the impact of natural hazard events.

Business Continuity and Supply Chain Services

The challenges that test your business the most are the unexpected ones. From facility fires to regional conflicts, supply chain disruptions, or a global pandemic, even brief interruptions can have long-lasting repercussions on a company's financial stability, customers and reputation. ZRS offers business continuity risk assessment services to help safeguard your operations against interruption risks.
