

Supply Chain Solutions

A holistic approach for lean, resilient supply chains

Who can benefit from Zurich's Supply Chain Solutions?

By identifying potential pitfalls, companies can proactively mitigate risk associated with supply chain disruptions. These companies include:

- Any organization dependent upon external providers to supply products or services to their customers
- Regulatory bodies and organizations supporting critical industries

Resilient supply chains are critical to successful operations.

Climate change, pandemics, geopolitical issues, natural hazards, fires and increasing cyber threats have created a perfect storm. In addition, labor shortages, availability of transport and raw materials, and rising costs are all impacting global supply chains.

Our risk management solutions can help you protect revenue streams, strengthen productivity and manage various risk exposures by:

- Identifying points of failure
- Quantifying supply chain resilience
- Defining mitigation strategies and actions
- Assessing the related financial exposure
- Determining ESG (environmental, social and corporate governance) risks within the supply chain

Supply Chain – Resilience Health Check

This assessment of your end-to-end supply chain risk management processes provides a deeper understanding of vulnerabilities – a valuable resource in planning risk responses and mitigation measures.

Supply Chain – Loss Scenario Analysis

Events such as natural disasters, fires, security breaches and many others can disrupt supply chains. Working with you, we will tailor realistic scenarios to test organizational resilience, and explore interdependencies and recovery options. The analysis also helps identify how your business response aligns to insurance coverage and highlights any gaps or weaknesses

Sustainable and ethical procurement and supply chain assessment

We assess your business's procurement components relating to environmental (climate), social and economic factors. We also review and report on Codes of Conduct (mission, values and guiding principles) for your business and critical suppliers and how these align to ethical procurement and supply practices

Leveraging AI risk management technology

Working with a leading supply chain risk management software provider, Zurich can help reduce your organizational risk. This software provides an early warning tool for monitoring and 24/7/365 notification of all sites, with real-time alerts should your supply chain become compromised. This allows for a rapid response to reduce operational impact.

Zurich Risk Advisor

Identifying and managing risk is made simple when you download Zurich Risk Advisor, our free risk assessment app.

Supply chain contingency/risk mitigation planning

We will assist with developing risk-informed plans to help protect your supply chain enhance your overall business continuity planning.

Critical Suppliers risk assessment

The risk assessment will identify critical assets and facilities, including links within your suppliers or distribution network. We can support you with understanding and assessing the risks within your suppliers' facilities which could have an impact on your own supply chain and business resilience. By completing assessments of suppliers' critical components, risks that may affect your capability to deliver can be identified and appropriate control measures implemented
