

# Zurich Fire Protection Training

Improving property protection and business resilience through effective protection management

In partnership with Johnson Controls International (JCI), Zurich Resilience Solutions have opened a state-of-the-art fire protection training centre in the Netherlands, delivering expert-led, hand-on training sessions with fully operational fire protection systems and equipment.

Training is available through open multi-customer sessions that encourage peer learning and discussion, as well as dedicated bespoke sessions tailored to individual organisational needs

# TechXchange Training Center Enschede, Netherlands

Participants will learn directly from Zurich Fire Protection Specialists while exploring the practical application, inspection, testing and management of fixed fire protection systems in a real-world environment. The programme also covers broader topics including property protection, management of impairments and change, operational resilience, industry standards and emerging risks.

Our open, multi-customer sessions provides valuable peer learning opportunities, enabling participants to share experiences, challenges and best practices across industries and organisations.

## Our trainers

We have >75 years of risk engineering experience.

Our trainers are Zurich risk engineers with extensive expertise in fixed fire protection systems.

Trainers have years of practical experience in risk management, fire safety and technical training.

## Specialist equipment

Multiple sprinkler system control valves

Fire pumps

Spray demonstration room

Gaseous and wet chemical extinguishing systems

Fire alarm and detection systems

# Fire Protection Training

“ The trainers’ comprehensive knowledge of sprinkler and deluge systems, paired with hands-on training, has better prepared me to ask the relevant test procedure questions on site, and to advise on system testing.

Hydro Insurance Department  
Risk Engineering Manager

## Key Takeaways

Comprehensive understanding of multiple fire detection, protection and extinguishing systems.

Knowledge to manage and support fire protection ITM contractors to protect your assets, people and business.
